Disclaimer

Unique experiences and past performances do not guarantee future results.

Trading in the off-exchange Foreign Exchange market (Forex) is very speculative in nature, involves considerable risk and is not appropriate for all investors. Therefore, before deciding to participate in Foreign Exchange trading, you should carefully consider your investment objectives, level of experience and risk appetite. Investors should only use risk capital when trading Forex because there is always the risk of substantial loss. Most importantly, do not invest money you cannot afford to lose. There is always the potential for loss. Your trading results may vary.

No representation is being made that any software or training will guarantee profits or not result in losses from trading.

Disclaimer

U.S. Government Required Disclaimer – Trading foreign exchange on margin carries a high level of risk, and may not be suitable for all investors. The high degree of leverage can work against you as well as for you. Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and therefore you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts.

CFTC RULE 4.41 – HYPOTHETICAL OR SIMULATED PERFORMANCE RESULTS HAVE CERTAIN LIMITATIONS. UNLIKE AN ACTUAL PERFORMANCE RECORD, SIMULATED RESULTS DO NOT REPRESENT ACTUAL TRADING. ALSO, SINCE THE TRADES HAVE NOT BEEN EXECUTED, THE RESULTS MAY HAVE UNDER-OR-OVER COMPENSATED FOR THE IMPACT, IF ANY, OF CERTAIN MARKET FACTORS, SUCH AS LACK OF LIQUIDITY. SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN.

Guppy Overview

©CompassFX, 2013
www.compassfx.com

Guppy MMAs

Understanding the GMMA

Short-term GMMA = Traders

The traders always lead the change in trend.

Their buying pushes up prices in anticipation of a trend change or continuation.

The trend survives only if other buyers also come into the market.

©CompassFX, 2013
www.compassfx.com

Guppy MMAs

Understanding the GMMA

Long-term GMMA = Investors

Strong trends are supported by long term investors and institutions.

The investor takes more time to recognize the change in a trend but he always follows the lead set by traders.

Guppy MMAs

Understanding the Guppies

- The Guppies, alone, do NOT initiate an entry or an exit.
- The Guppies allow a trader to understand the market relationships shown in the chart and trend activity.
- Traders should not attempt to make the Guppies “work” in all conditions. In other words, do NOT force a trade because you “think” you see a setup.
- Wait for the proper Guppy setup that corresponds to a DOTS entry level...then TEST the trade setup!

Guppy MMAs

Understanding the Guppies

Compression Phase

Means “Caution”...suggests there is an agreement among traders and/or investors at a price level.

Traders and/or investors are potentially exiting positions... and possible competition between traders and investors.

©CompassFX, 2013
www.compassfx.com

Guppy MMAs

Understanding the Guppies

Expansion Phase

Means “Buying or Selling” in the direction of the trend.

Often there is significantly greater movement seen in traders.

Expansion seen in investors is a sign of continued strength in the trend.

©CompassFX, 2013
www.compassfx.com

Guppy MMAs

Understanding the Guppies

Penetration Phase

Means “Change”...traders moving in opposite direction from investors.

If investors are reluctant to change, traders are pushed back into the original trend direction. But, if investors fail to continue with trend, then expect change in the trend.

©CompassFX, 2013
www.compassfx.com

Guppy MMAs

Understanding the GMMA

Braiding / Weaving

Means “Price Agreement” from traders and investors.

No clear trend direction seen from traders or investors.

Traders are the first to move.

DOTS-Guppy Trade

©CompassFX, 2013
www.compassfx.com

DOTS-Guppy Trade

“Sonny Setup”

- ◆ Identify Long-term Guppy Multiple MAs
- ◆ Identify Short-term Guppy Multiple MAs
- ◆ Wait for trade setup – Trade Entry Checklist
- ◆ Use DOTS levels for Entries & Exits.
- ◆ Integrate a trade management plan.

©CompassFX, 2013
www.compassfx.com

DOTS-Guppy Trade

“Sonny Setup”

©CompassFX, 2013
www.compassfx.com

DOTS-Guppy Trade

Sonny's Entry Criteria

1. MUST have good Angle and Separation (*DOTS-Guppy Pattern*)
2. Trade the Short-term Guppys in the direction of the Long-term Guppys.
3. Set Pending Orders... *pending orders take fear out of pulling the trigger.*
4. Trade after the news! No pending orders around RED news announcements.
5. Look to take valid entries on currency pairs of 5-pip spread or less.

©CompassFX, 2013
www.compassfx.com

©CompassFX, 2013
www.compassfx.com

DOTS-Guppy Trade

Trade Entry Checklist

- Angle
- Separation
- Alligator Mouth
- Trend Direction
- Higher Time Frame
- Previous High/Low
- Long-term Rollover
- Average Daily Range
- Support & Resistance
- Previous DOTS Session
- RED News
- Market Sentiment

©CompassFX, 2013
www.compassfx.com

Angle

Slope of the Short-term and Long-term Guppys

Long Trade
Angle of Guppys
between
12:30 & 2:00

©CompassFX, 2013
www.compassfx.com

Angle

Slope of the Short-term and Long-term Guppys

Short trade
Angle of Guppys
between
4:00 & 5:30

©CompassFX, 2013
www.compassfx.com

Separation

Increasing distance between Short-term Guppies...
Even better probability with Long-term Guppies

Look for increasing separation between the 15 and 30 EMAs.

©CompassFX, 2013
www.compassfx.com

Separation

There are two elements of Separation:
Expansion and **Compression**

Expansion – increasing separation between the moving averages.

Compression – decreasing separation between the moving averages.

©CompassFX, 2013
www.compassfx.com

Alligator Mouth

A distinguishable separation between the 15 EMA and 30 EMA.
Look for strong “rising” or “declining” angle of the 15 EMA.

©CompassFX, 2013
www.compassfx.com

Alligator Mouth

A distinguishable separation between the 15 EMA and 30 EMA.
Look for strong “rising” or “declining” angle of the 15 EMA.

©CompassFX, 2013
www.compassfx.com

Trend Direction

Consider Slope & Direction of
Short-term & Long-term Guppys.

©CompassFX, 2013
www.compassfx.com

Trend of Higher Time Frame

Look for agreement between 15 and 30 minute charts.

15-minute

30-minute

©CompassFX, 2013
www.compassfx.com

Previous High or Low

Consider the break of a Previous High or Low near a Buy Entry or Sell Entry as addition trade confirmation.

©CompassFX, 2013
www.compassfx.com

Long-term Rollover

Monitor 30 EMA & 55 EMA Rollover

©CompassFX, 2013
www.compassfx.com

Test of the Long-term Rollover

After a 30 / 55 rollover, **EXPECT** the market to test the Long-term Moving Averages!

© CompassFX, 2013
www.compassfx.com

Average Daily Range

Compare the Range of the Day to an Entry Level.

- Consider the distance of price movement from High to Low over the session or day, then compare to the ADR.
- If the market has hit or surpassed the ADR, look for possible retracement.
- If the current Buy Entry or Sell Entry is near the ADR, re-evaluate the entry.

© CompassFX, 2013
www.compassfx.com

Support / Resistance

Price has the tendency to trade between major and minor Support and Resistance levels.

©CompassFX, 2013
www.compassfx.com

Previous DOTS Sessions

Previous DOTS Sessions can influence following DOTS session.

- Check the previous sessions.
- Look for executed or still valid 15 minute charts.
- Note: If price is range-bound between the Buy Entry and Sell Entry from one session to the next, then maintain the previous sessions DOTS levels.

©CompassFX, 2013
www.compassfx.com

High-Impact **RED** News

*High impact new events can cause temporary price spikes.
Avoid trading 30 minutes to 1 hour before **red** news.*

Be aware of these news events:

- Interest Rate Announcement & Central Bank Minutes
- Employment / Unemployment (NFP)
- Gross Domestic Product (GDP)
- Consumer Price Index (CPI)
- Purchasing Managers Index (PMI)
- Trade Balance
- Home and Retail Sales

Avoid trading at the Open of a session... price can quickly spike only to retrace to session open. Be patient and allow the market to test levels.

Market Sentiment

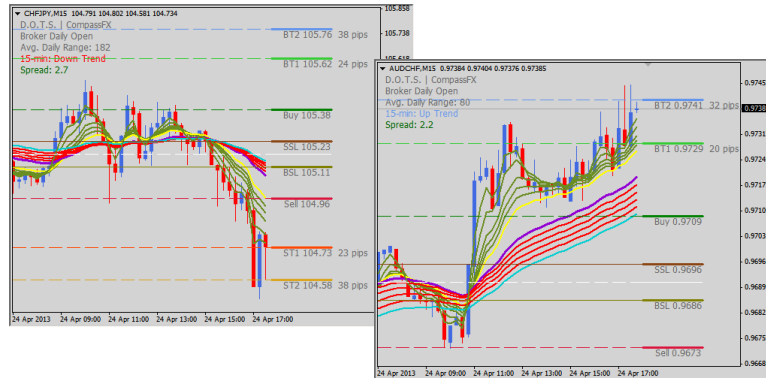

Sentiment is the prevailing market attitude as a result of the overall economic assessment, fundamental and technical factors and market reaction to world events.

*Monitor the market
for currency strength
or weakness.*

Market Sentiment

CHF Weakness... affects other CHF currency pairs.

©CompassFX, 2013
www.compassfx.com

Trade Management

©CompassFX, 2013
www.compassfx.com

Trade Management

1. Set a daily profit goal and loss limit.
2. Keep focus on the trading process.
3. Plan ahead & use trading resources.
4. Review your trades.

©CompassFX, 2013
www.compassfx.com

Sonny's Trade Management

- Risk 2% or less of account per trade.
- Follow trade with Stop Losses... or use a trailing stop loss
 - + 10 pips after Entry ... move to breakeven + 2 pips.
 - Price beyond Target 1 level ... move to Target 1 + 2 pips.
 - Price beyond Target 2 level ... move to Target 2 + 2 pips.
 - Then... use a 13.5 or 15 pip trailing stop.
- At entry, set the Stop Loss at the DOTS Stop Loss level.
- If after entry the trade "looks weak", kill the trade.
 - Guppy's breaking down / pinching / crossing of small MAs
 - Yellow Guppy line going flat
- Don't double dip
- When the pattern is "breaking down"... look to exit.

©CompassFX, 2013
www.compassfx.com

Stop Loss

A stop loss is a pre-determined price to exit the market if the market moves against the trader.

- Place stop loss at the DOTS Stop Loss level.
- Place Stop Loss beyond the 30 EMA or 55 EMA.
- Place stop loss below the last Low of a long Alligator Mouth or above the last high of a short Alligator Mouth.

©CompassFX, 2013
www.compassfx.com

Stop Loss

A stop loss is a pre-determined price to exit the market if the market moves against the trader.

- Place stop loss at the DOTS Stop Loss level.
- Place Stop Loss beyond the 30 EMA or 55 EMA
- Place stop loss below the last Low of a long Alligator Mouth... or above the last high of a short Alligator Mouth.
- Place a stop loss above/below a major resistance or support line.
- Place stops a few pips above the last Swing High for a Short trade, or a few pips below the last Swing Low for a Long trade.
- Place a stop loss just beyond a Fibonacci level.

©CompassFX, 2013
www.compassfx.com

Trailing Stop Loss

One of the most effective ways to protect profits is to use a Trailing Stop Loss order. A Trailing Stop Loss maintains a stop-loss order at a precise distance or percentage away from the market price.

1. Place a Trailing Stop Loss a certain number of pips away from the current price such as 11.5, 13.5, or 15 pips.
2. Place a Trailing Stop Loss a certain percentage away from the current price such as 2.5% to 5%.

Regardless of the specific technique, the use of a trailing stop to follow a trade and lock in profits as well as modifying the Limit (take profit) order is a disciplined approach to trade management.
