thanks to seller, sam, shum, and many other which had stored(in form of code) inside our EA & indicators.

now we have MORE THAN 10UP BEST INDICATORS COMBINATION INSIDE SELLER INDICATOR (NEW INDICATOR V6) AND 60 UP DIFFERENT TRADE LOGIC CODED INSIDE BASKET EA TO TRADE WITH MARKET.

NOT AS PER WHAT WE THINK.

so please give some time to read and watch videos which are linked in first post by seller.

/--/--/--

something which already explained by Seller and Sam but form different point/angle is here once again, its not new.

if you look at % of JPY and % of AUD in posted example.

its looks like JPY is super weak & AUD is super strong.

cross check is it right side of the market?

... so pls we have to check it pair by pair before jump on the trade..

so lets check it one by one (eg 😊)

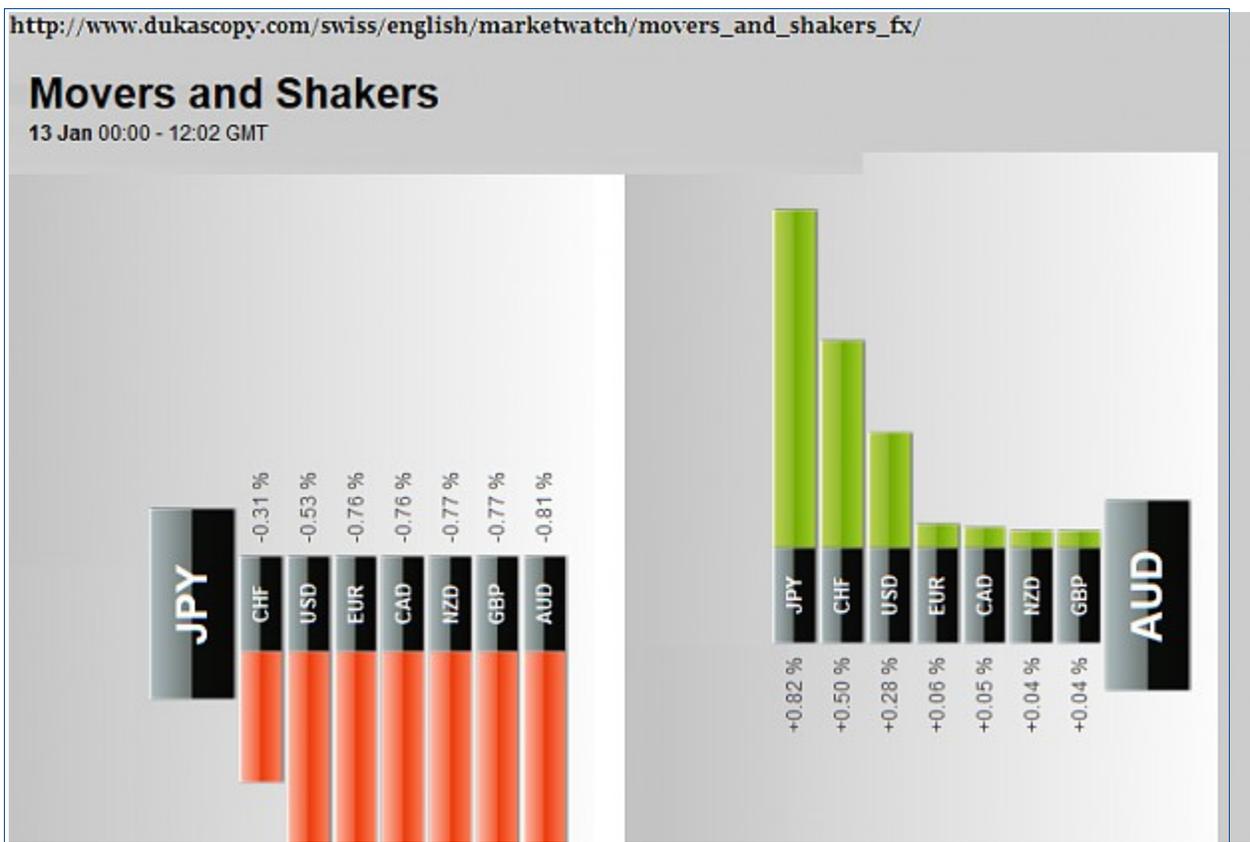

AUD ~ JPY booth are equal strong (bull & bear fighting, so price go no where)

CAD weaker than JPY
CHF weaker than JPY
EUR weaker than JPY
GBP weaker than JPY
NZD weaker than JPY, but NZD getting stronger. (watch it, before u place order)
USD weaker than JPY

so its means JPY is strong instead of weak, this things we have to check on 4H or daily.
and keep in mind no need to run behind the price we can enter with pending order at 38% or 50% FIB
on daily candle and our stop loss should be near by FIB 61% to 61% +23%.
(and we can do similar check for AUD, booth were strong during Asia Session)

Regards,
hukam
