

quote} thanks for the response.....you sound like you trade inside the zone..i thought it was suppose to be from zone to zone.....

I never once said it was only zone to zone.

I trade wherever the trades are. Inside of a 4 hr zone or from zone to zone... If you trade 5 min zones only than inside the zone is too small. If I have a 100 pip 4 hour zone and I get a set-up into the zone low for a buy then for sure I will go long to at least 50%. I have many set-ups for inside the zones, outside the zones and for entries as price enters back into a zone. It all depends on how big the zone is. UHV WRB's make the best zones because they give many different trading opportunities.
