EA panel position setting, distance count from right bottom corner of the window

Option for Close All and Close Profit buttons
false -> close orders in current chart
true -> close orders in all charts

When your account balance change, the EA have to calculate all over again
This option let you choose which paramater you want to keep it unchanged during calculation

Option to let EA close your order "manually" <- Test before use it
Include all fees = true -> actual profit when close order is exactly equal to take profit * pip value
or stop loss * pip value <- Test before use it

If you just want to use the EA panel to entry quickly,
turn the option "Use Hidden SL & TP" to false
it will place your order with the stop loss and take profit levels you choose on panel

Just remind: The path must end with "\"
or it will create screenshot file in Forex folder with the name begin with "test snapshot"

Screenshot's file name in default have format like this date_time_currency_period_.png
These option let you reorder those info
Choose 0 to omit the info (Ex: Position period in filename = 0, file name will be date_time_currency_.png)
