

Here's How It Works (more training to come)

The 3 pip to 15 pip Renko or Range bar charts are the best.

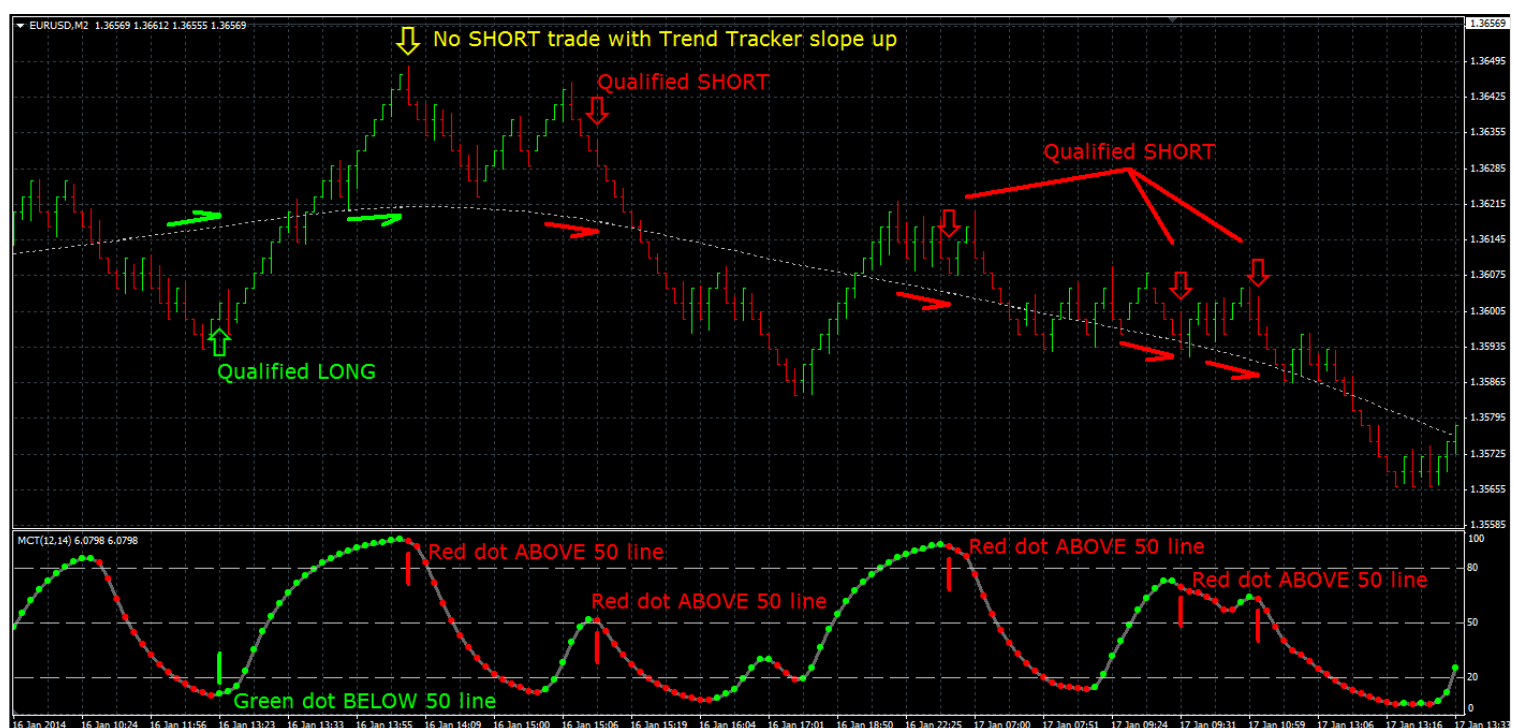

- Scalping —> 3 pip to 5 pip charts.
- Intraday Position Trading —> 6 pip to 8 pip charts
- Multi-day Position Trading —> 9 pip to 15 pip charts

Here are the times we like to trade:

US Session Window – 07:00 am to 2:00 pm

Asian Session Window – 7:00 pm to 11 pm

EU Session Window – 01:00 am to 4:00 am

If for some reason you don't have the trend line showing and you've tried everything in both the videos. Right click and go to your indicators list. Double click on Trend Tracker (or Trend Hijack) and go to common. Make sure you check **ALLOW DLL**. Go to input and make sure your ATR multiplier is set to 0.001 Then go click on the MTC folder and go under the common tab and allow DLL. That should fix the issue.
