EVERYTHING YOU NEED TO
SUCCEED IN THE MARKETS

The System

You'll be amazed when you understand the system...

The system uses **PEBS** to enter positions, PEBS means **Percentage Based Entry System**, this system has saved us many times and allowed us to either keep our risks small when and reap rewards when winning.

The **PEBS** are generated by 6 different factors, they are,

- Exponential Moving Averages
- Mathematical Points of Interest
- Candlesticks
- Cause & Effect
- Trend Lines
- Patterns

THE INTRO

1

The 6 Factors That Grab Pips

1. Exponential Moving Averages

We use 4 **EMA's**, they are all here to confirm the short, medium and long term trend and have once applied to everything else become very effective.

The **EMA's** we use are the 3,6,9 and 200 day.

- 3 days: Blue
- 6 days: White
- 9 days: Red
- 200 Days: Yellow

2. Mathematical Points of Interest

The **MPI's** are here to provide incredibly accurate vibration areas on the chart. This feature alone has been directly responsible for thousands upon thousands on Points In Profit (Pips). Below is everything you need to set them up.

We use the Fibonacci tool to set the **MPI's** by changing the numbers & percentages

0%	112.5%
12.5%	125%
25%	137.5%
37.5%	150%
50%	162.5%
62.5%	175%
75%	187.5%
87.5%	200%
100%	

To understand the the value of the MPI's just keep attending the Live Trading Chambers.

3. Candle Sticks

Probably the hardest to master trait of the N9T Trading system but just like the other 5 factors, very valuable.

4. Cause & Effect

Every movement in the market is the result of a natural law and of a Cause which exists long before the Effect takes place and can be determined years in advance. The future is but a repetition of the past.

Every single effect must have an adequate cause, in life or the markets, this principle applies very well.

Water seeks its level, you can force it higher with a pump, but when you stop pumping it requires no force to cause it to return to its former level.

The financial markets are the same. They can be forced above their natural level of values to where lambs lose all fear, become charged with hope and buy at the top.

Then the assets are permitted to sink to a level where hope gives way to despair and the most rampant bull becomes a bear and sells out at a loss.

We use time factors that enable us to tell in advance when these extremes must, by the law of supply and demand, occur in the financial markets.

We have an above 90% success ration when predicting events, from Trump winning the presidency of the USA, to making money in every single NFP, our systems work for reasons backed by universal facts.

5. Trading Patterns

There are two types of chart patterns, reversal and continuation. And a market can only do 1 of 3 things, go up, go down or move sideways.

We use chart patterns to enhance the reward, limit risks and compound our trades.

There are 3 different pattern percentages, High, Moderate and low. To learn more about chart patterns follow ourdaily analysis & workshops.
