1.2730
STOP (This is our Entry)

Current Market 1.2700

NOTES: Initially places a stop limit order (either a buy or sell), which works like a Stop Market order with one major exception. Once the order is activated (by the currency trading at or through the stop price), it does not become a market order. Instead, it becomes a limit order with a specified limit price. Your order fill price will be either at your specified limit price or better.
