

## Higher Timeframe Pattern Breakout

I don't actively seek to find patterns on my higher timeframe.

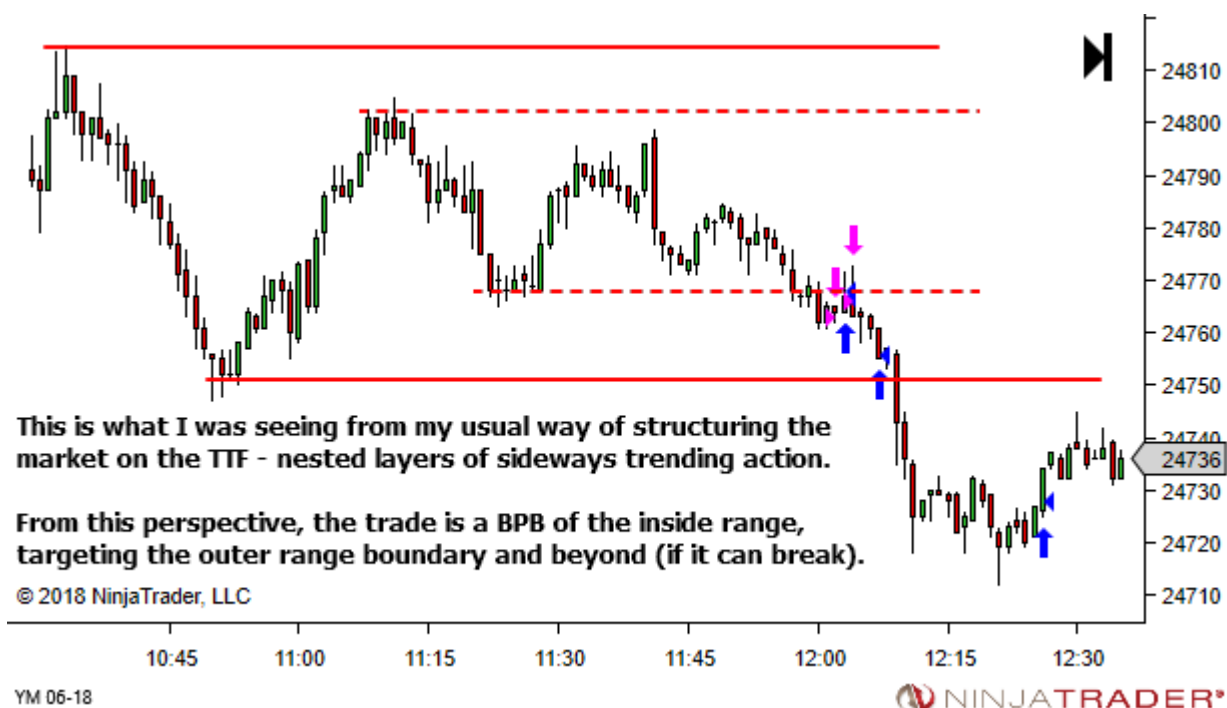

But sometimes they just stand out as so obvious that you can't miss them.

So I watch them for potential trade opportunity around the edges of the pattern structure. Usually for two alternatives - a breakout failure or a breakout pullback.

Of course, in either case the trade idea must make sense from my usual trading timeframe analysis. And also make sense in accordance with [my philosophy on price movement and where & how it creates opportunity](#).

Keep an eye out for them. They can provide good opportunity.

So while I'm trading this

The fact that I can also see this on the Higher Timeframe just adds a little to the conviction and belief in the trade.

Happy trading,

*Lance Beggs*
