

## **This instruction is for Genius Binary Options indicator**

- ❖ The Genius Binary Options it predict the next candle if its Bull / Bear candle.
- ❖ Best pairs in M5 are GBPUSD then EURUSD, For M15 is USDJPY, For M30 is EURGBP.
- ❖ Time frame from M5 and higher.
- ❖ Use the indicator in this trading hours only 8:00 AM to 9:00 PM GMT
- ❖ The indicator can be used with MT2IQ software for auto trading.
- ❖ In worst day of trading with the indicator it make 56% win ratio and in best day of trading it make +90% win ratio. But you can increase the win rate by using martingale

---

**To reach about 70% win rate (statistics are not accurate) use only 1 step martingale.**

- ❖ But you must understand that i have developed my indicator if first trade was loss then it will go for cycle, i mean the next signal will have much win rate and so on until it reach the good signal, and then it will start new cycle again.
- ❖ So if you decide to use 1 step martingale to reach about 70% win rate then if the 1st step martingale was loss then don't enter more trades until it reach the good signal, then you can enter new trade in the new signal that come after last good signal. Example in the photo.

**To reach 100% win rate (statistics are not accurate) then use it in GBPU5D M5, USDJPY M15, EURGBP M30. With 6 step max. martingale.**

**For using Martingale you need at least 332\$ balance or more for every 1 pair.**

Balance	332\$	500\$	700\$	850\$	1000\$
<b>1<sup>st</sup> trade</b>	1	1.5	2	2.5	3
<b>Martingale Step 1</b>	2.4	3.6	4.8	6	7.2
<b>Martingale Step 2</b>	5.8	8.64	11.52	14.4	17.28
<b>Martingale Step 3</b>	14	20.73	27.64	34.56	41.47
<b>Martingale Step 4</b>	33.6	49.76	66.35	82.94	99.53
<b>Martingale Step 5</b>	80.7	119.43	159.25	199.06	238.87
<b>Martingale Step 6</b>	193.7	286.65	382.20	477.75	573.30

The indicator can be used with both MT2IQ & MT2Binary software for auto trading. In the screenshot the settings of the MT2IQ Connector for entry type & martingale.
