

EQUITIES

Micro E-mini Futures

Launching May 2019

Meet **Micro E-mini futures**, the next big thing in equities trading. Discover the benefits of trading equity index futures for a fraction of the financial commitment.

Four Index Contracts for Benchmark Equity Exposure

Micro E-mini S&P 500:

Trade exposure to U.S. large-cap stocks, the leading barometer of U.S. stock market

Micro E-mini Nasdaq-100:

Trade exposure to the largest non-financial companies in the Nasdaq stock market

Micro E-mini Russell 2000:

Trade exposure to 2,000 U.S. small-cap stocks, the leading small-cap benchmark

Micro E-mini Dow:

Trade exposure to 30 U.S. blue-chip companies, a widely followed indicator of U.S. stock market

Why Trade Micro E-mini Futures?

Trade a slice of the most liquid equity index futures

Get the same benefits that make E-minis a staple on Wall Street, now on a main street budget at 1/10th the contract size. Enjoy nearly 24-hour trading, no management fees, portfolio diversification and more.

Enjoy greater versatility in your trading strategies

Fine-tune your equity market exposure or tailor a position to reduce risk. With futures, you can go short as easily as you go long – no short-selling restrictions. Full fungibility with E-mini futures adds more flexibility for your trading positions.

Use leverage to get more out of your money

Control a large contract value with a small amount of capital and no expense ratios for max capital efficiency. Add greater upside with potentially lower trading costs vs. a basket of securities or exchange traded funds (ETFs).

Subject to regulatory approval.

Neither futures trading nor swaps trading are suitable for all investors, and each involves the risk of loss. Swaps trading should only be undertaken by investors who are Eligible Contract Participants (ECPs) within the meaning of Section 1a(18) of the Commodity Exchange Act. Futures and swaps each are leveraged investments and, because only a percentage of a contract's value is required to trade, it is possible to lose more than the amount of money deposited for either a futures or swaps position. Therefore, traders should only use funds that they can afford to lose without affecting their lifestyles and only a portion of those funds should be devoted to any one trade because traders cannot expect to profit on every trade.
