BEAST SUPER SIGNAL®

Hello trader and thank you for purchasing the new Beast Super Signal®! We are sure you will find it highly profitable for your forex and binary trading career! The Beast Super Signal® was created combining 4 powerful strategies into an all on one indicator that will provide you with high probability buy and sell signals that can be traded on your forex and binary platforms, and it is also 100% NON repainting! Please carefully read the instructions below on how to install the indicators into Metatrader4 correctly, and how to use the Beast Super Signal® successfully.

Installation of indicators and template of Beast Super Signal®

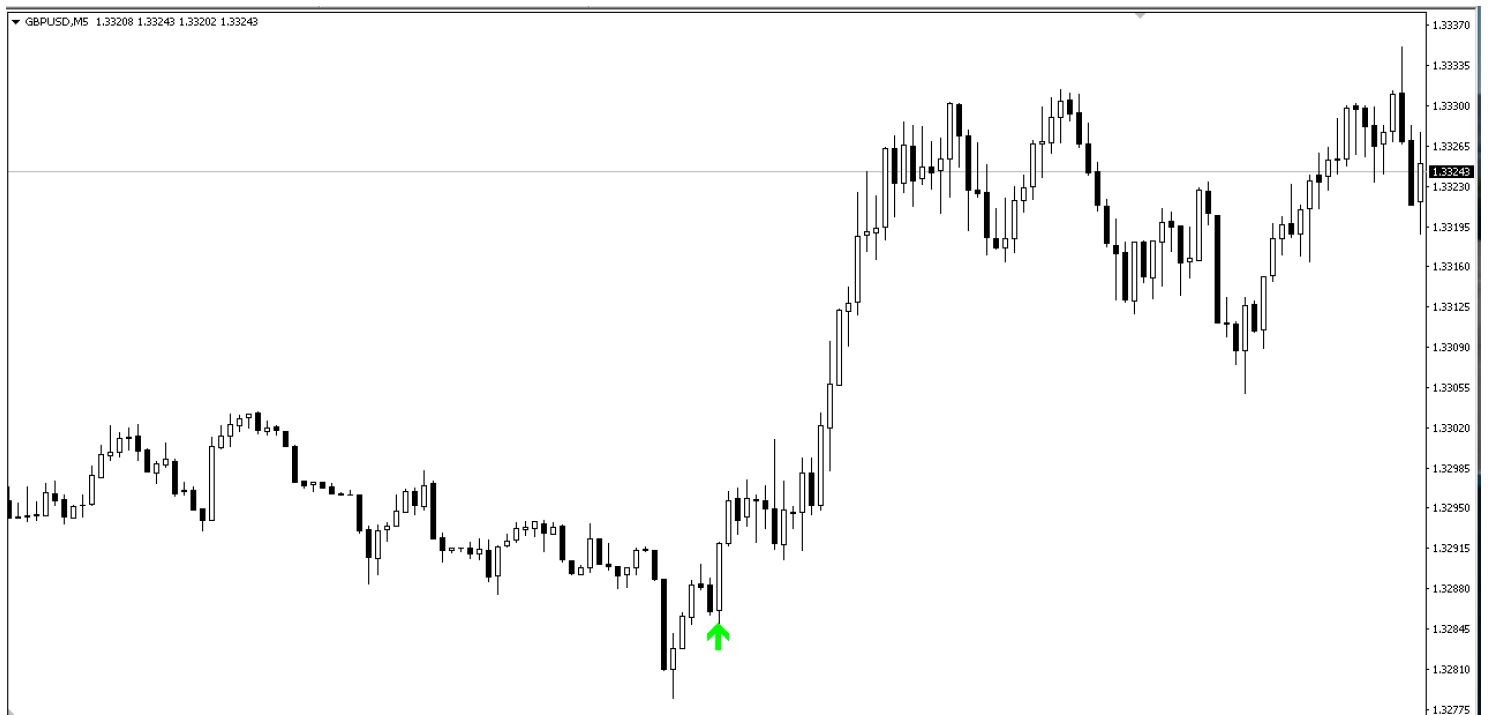

1. Unzip/Extract the zip file with the template and indicators.
2. Open the MT4 Data Folder and click on MQL4.
3. Copy and paste all the indicators and template to their respective folders.
4. Refresh your Navigator window or restart the terminal.
5. Open any currency chart.
6. Select the template Beast Super Signal.
7. Change the chart time frame to H4/H1 for forex, and M5/M1 for binary.

Additional notes:

No additional indicators are needed for confirmation; we have combined 4 of our powerful trusted strategies using Support and Resistance, Overbought and Oversold Zones, Trend Analysis, and Price Action, so you only need to wait for the signal alert and then trade. Best results are trading on M5/M1 chart for binary, and H4/H1 (recommended) and M15 (Scalping/High risk) for forex.

Bonus Indicators:

Included, as free bonuses are 2 of our personal favorite indicators, a candle timer showing the remaining time for the current candle, and a pips counter so you can keep track of how many pips you are in profit. We wish you best of success with the new Beast Super Signal® and we hope it will be as profitable for you as it is for us! Thank you!
