Once alert/notification of a particular pair has been sent, the next alert/notification of that pair will be sent after 5 minutes upon signal.

Basket means all active (open) positions opened by this dashboard with the same magic number. The basket profit is the total profit of all these active positions

Note

Note1: Basket means all active (open) positions opened by this dashboard with the same magic number. The basket profit is the total profit of all these active positions. e.g. Dashboard open 10 positions (not close yet), each order has a profit of \$2. So the total profit is $10 * \$2 = \20 . If the basket take profit is \$20, then the basket TP will be hit.

Note2: autotrade will open at most 1 position per pair based on signal generated. If signal occurs but position already exists for a particular pair, no order will be sent. However, you can manually click on 'buy' and/or 'sell' button to any number of positions you want (click once send one order).

Note3: Once alert/notification of a particular pair has been sent, the next alert/notification of that pair will be sent after 5 minutes upon signal. The alert and notification are implemented in this way to make sure you receive them once during a certain period instead of numerous alerts/notification coming to you continuously.
