123	Max orders running: numbers of orders	1

Restricts the no of trades running simultaneously

Maximal time of trades

ab	===== Closing at X o'clock =====
Close at X o'clock: use	false
123 Close at X o'clock: hour	17

Restricts the time of trades to maximal 17:00

Trade Filters - Simple

ab	Filter for 'Moving Average' \\\\\\\\\\\\\\\\\\\\\\\ Filter for 'Moving Average' \\\\\\\\\\\\\\\\\\\\\\\
 Moving Average dir: use	false
 Moving Average dir: Period	25
 Moving Average dir: Mode	Exponential
 Moving Average dir: Applied price	Close price

Filters the Trades in condition of the last candle!

MA, pSar: Candle is over Indicator

Double MA, double pSar: Candle is over both Indicators

CCI, RSI: Indicator is over „half“(CCI:100; RSI:50)

„Filter last candle“: Trades only in the direction of the last candle

Trade Filters - Double

ab	_	\\ Filter for 'Two Moving Averages' \\\
	Two Moving Average dir: use	false
123	Two Moving Average dir: Period 1	25
123	Two Moving Average dir: Mode 1	Exponential
123	Two Moving Average dir: Applied price 1	Close price
123	Two Moving Average dir: Period 2	50
123	Two Moving Average dir: Mode 2	Exponential
123	Two Moving Average dir: Applied price 2	Close price
ab	_	\\ Filter for 'Double pSar' \\\
	pSar dir: use	false
1/2	pSar dir: step 1	0.01
1/2	pSar dir: max 1	0.2
1/2	pSar dir: step 2	0.004
1/2	pSar dir: max 2	0.2

Filters the Trades
with 2 MAs

Filters the Trades
with 2 MAs

MA, pSar: Price is over both Indicators

Optional: Break-Even

===== Break Even =====	
use Break Even	false
Set if this value is reached	150
Value moving SL	100

Number of Points to
trigger the Break-Even
Setting

Number Points of where
the new SL is set

Example: if the price runs 150 or more in profit, then set the SL to 100 points

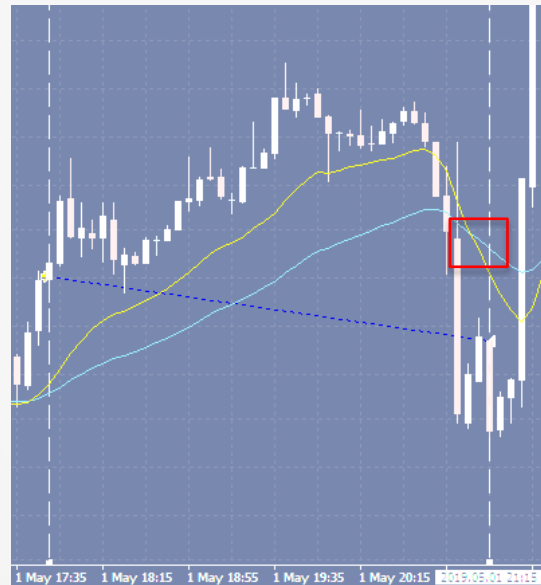

Optional: Fixed TP

===== Settings for fixed TP =====	
123 TP style	No TP
123 Fixed Number of Points for TP	40

Sets the fixed TP if
enabled

Optional: TP – MA Cross

ab	_____	===== Settings for Trailing MA Cross ===...
	use MA trailing	false
123	MA cross trailing: Type of both	Exponential
123	MA cross trailing: Fast Period	8
123	MA cross trailing: Slow Period	21

TP when MAs are
crossing

Optional: Fixed SL

ab	_____ Settings for fixed SL _____
123 SL style	No SL
123 Fixed Number of Points for SL	60

Sets the fixed SL if
enabled

Optional: Trailing Stops – Distinct Trailing

Enables the trailing

abl	_____	===== Settings for trailing distinct SL =====
	use distinct trailing SL	false
	Start trail if profit is >= this value	100
	Number of points for Trailing SL	60
	Step of Trailing SL	20

Sets the start value in points, the number of points to trail, the step when to change the trail if price goes in the right direction

Example: if the price runs 100 or more in profit, then set the SL to 60 points, trail if the sl is 80(60+20) points from the price and so on!

Optional: Trailing Stops – EMA, pSar, Fractals and ATR

ab	—	===== Settings for Trailing pSar SL =====
	use pSAR trailing	false
	pSar trailing: step	0.01
	pSar trailing: maximum	0.2
ab	—	===== Settings for Trailing Fractals =====
	use fractals trailing	false
	Fractals trailing: No of Candles to look right or left	24
	Fractals trailing: Distance in Points from Fractal	0
ab	—	===== Settings for Trailing MA =====
	use MA trailing	false
	MA trailing: Type	Exponential
	MA trailing: Timeframe	current
	MA trailing: Period	20
	MA trailing: Applied price	Close price
ab	—	===== Settings for Trailing ATR =====
	use ATR trailing	false
	ATR trailing: Ratio	2.0
	ATR trailing: Timeframe	current
	ATR trailing: Period	20

Trail the last value of pSAR!

Trail the last value of last Fractal!

Trail the last value of MA!

Trail the last value of ATR!

Optional: Trailing Stops – Zigzag

Take the last low/high of zigzag and set this value to SL

ab	_____	===== Settings for Trailing ZigZag =====
	use ZZ trailing	false
	ZZ trailing: Depth	12
	ZZ trailing: Deviation	5
	ZZ trailing: Backstep	3
	ZZ trailing: Distance from ZZ high low	10

Optional: Trailing Stops – Shadow

Enables trail

Sets TF of candles for trailing

Sets the number of candles for trailing

===== Settings for trailing shadow SL =====	
use Shadows trailing SL	false
TL Shadows: Timeframe	current
TL Shadows: No of Bars	3
TL Shadows: Distance from last high/low	10
TL Shadows: Trail if in loss	false

Sets the distance the sl is set from last high/low

Trails even the trade is in loss

Optional: Trailing Stops – MA High/Low

ab	_____ Settings for Trailing MA High/Low _____
 use MA trailing	false
 MA cross trailing: Type of both	Exponential
 MA cross trailing: Period	20

Trails for buy trades with MA low and for sell trades with MA high

Optional: Basket Closing

ab	===== Basket closing =====
Basket closing: use	true
Value when to close all trades	10.0

Closes the trade if the value of 10 points are reached for all open trades!

Optional: Time pyramiding

Time pyramiding	
Time pyramiding: use	false
Time pyramiding: Add trade every X minutes	15
Time pyramiding: Add X trades	1
Time pyramiding: add only if x points in profit	false
Time pyramiding: x points in profit	10

Adds every X minutes X trades

Adds only if last trade is 10 points in win

Adds every X minutes X trades if(optional) the last (added) trade is 10 points in profit!
