

## MATRIX

I have tried all indicators, meters and systems ... under the sun without success.

The only system that worked for me is BK8 system with bb and Sma 5

I am now learning a bit about support and resistance, and price respecting levels.

Floors and roofs

But-

I wanted something so I could run through the charts and get an overview in a few minutes and do it by hand to my notebook. Fixed and ready to go back to the day after and compare the changes

I wanted to be able to make some little signs of a change or something that I note and can return to and study further – for ex. putting a star, when I think it will turn. Make a vertical line when there is an extreme wick. Make a horizontal line when it is flat.

Make a !!! when the candle - body is extremely big

Make an x and a line up or down of it to say there is a candle but there is a long wick.

...

Sometimes I only put x if they fit to a certain system. For ex. the one BK8 has – and can have a look have those pairs relate.

....

This is D chart.

Quick to do in other timeframes.

To check if GBPUSD fits with the BK8 system – and is good to go short if

USD>Aud>GBP

Etc

Etc

The best thing is overview in 3 minutes.

I just made the matrix for 01.08.2019 for us to discuss out from.

	a	c	ch	e	g	y	u	v
a								
c	x							
ch	x	x		x	x		x	x
e	x	x		x			x	
g	x							
y	x	x	x	x!	x		x	x!
u	x	x			x			
v						x		

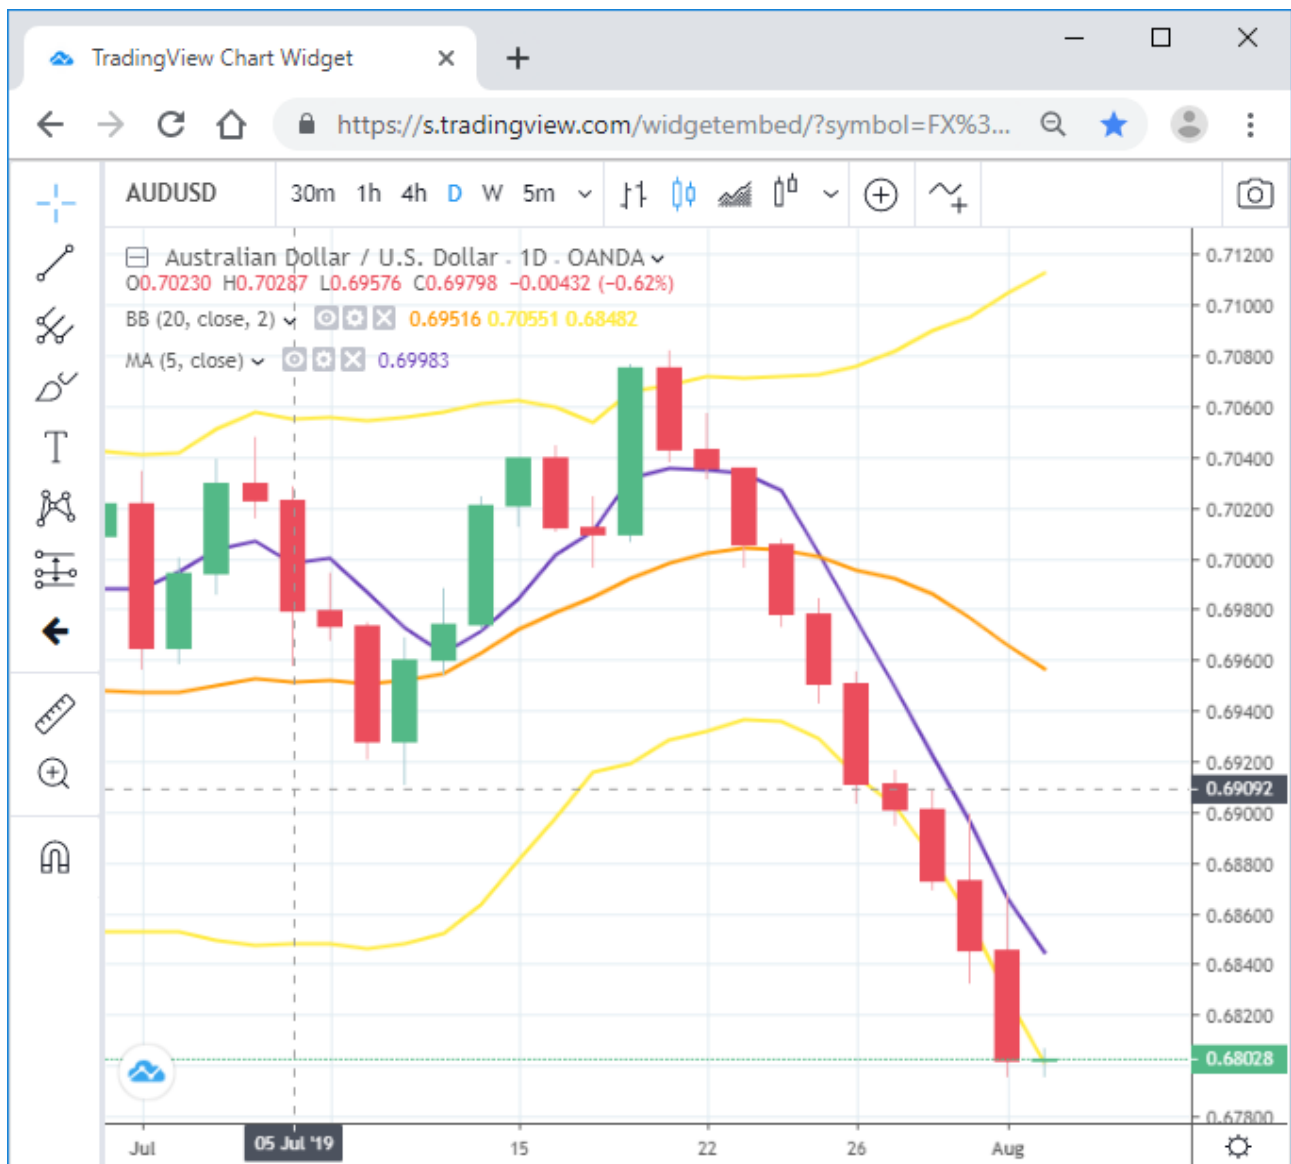

We go down to the stronger and over to the weaker and put x

Here we see CHF - JPY is strong yesterday

F. ex. You can see chf and jpy follow - and aud cad nzd followed in being weak

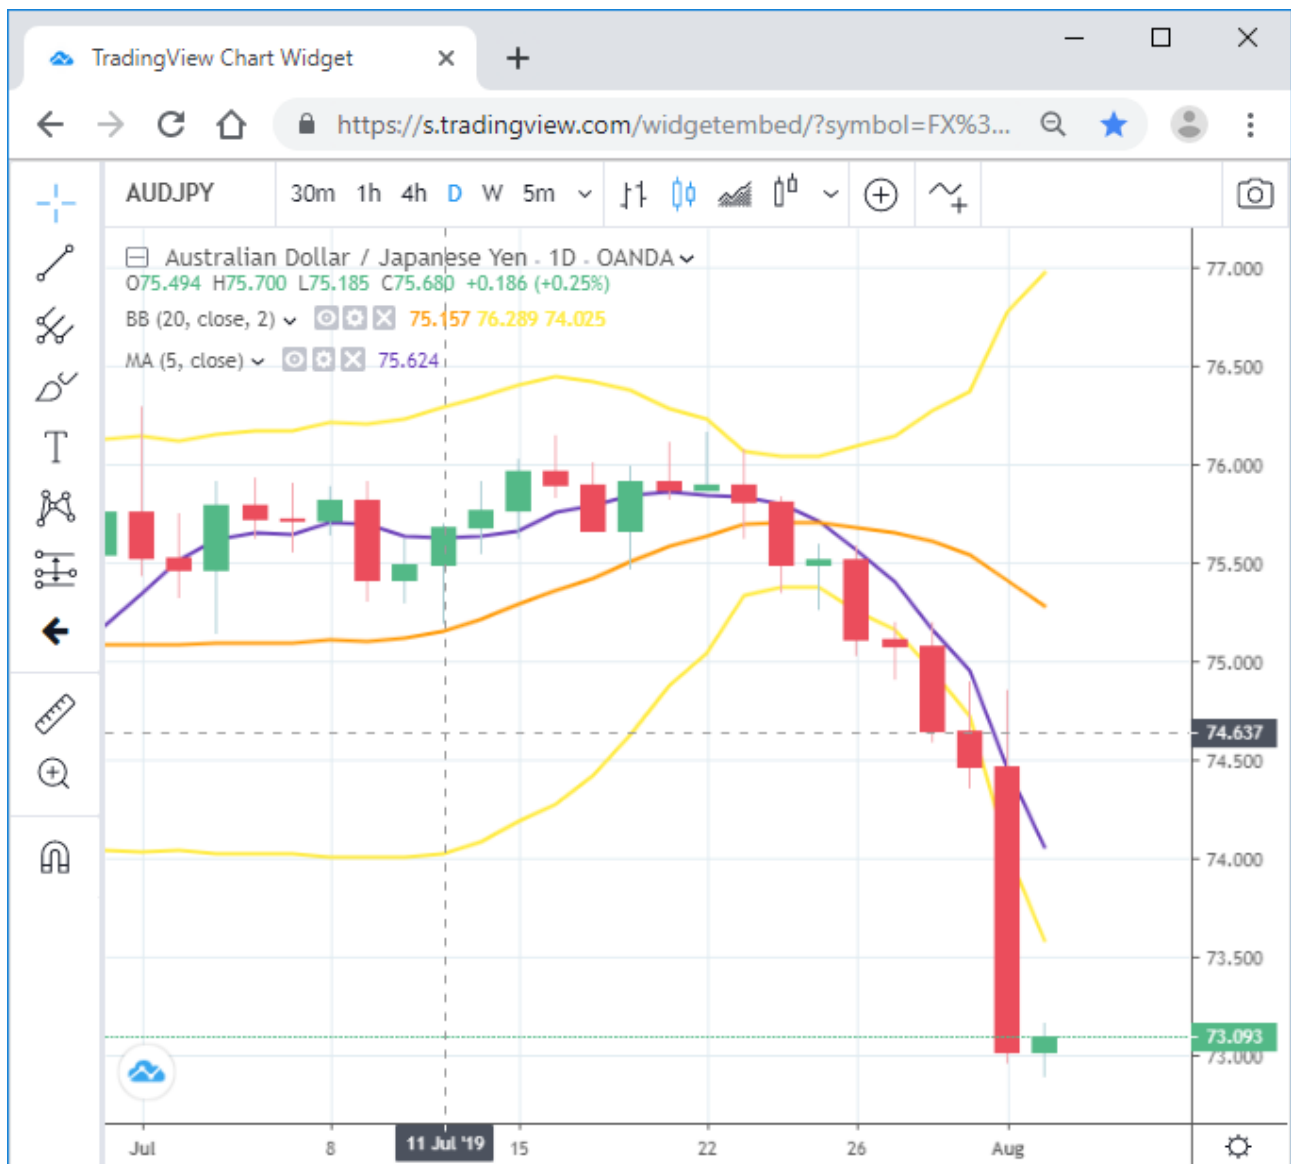

Eur is somewhat strong over . . . but gbp is not strong Well I hope you can use for anything.

- Once more: Overview in minutes was what I needed – and have in my notes.
- Not the computer and excel – no by hand put something extra - take something away.
-

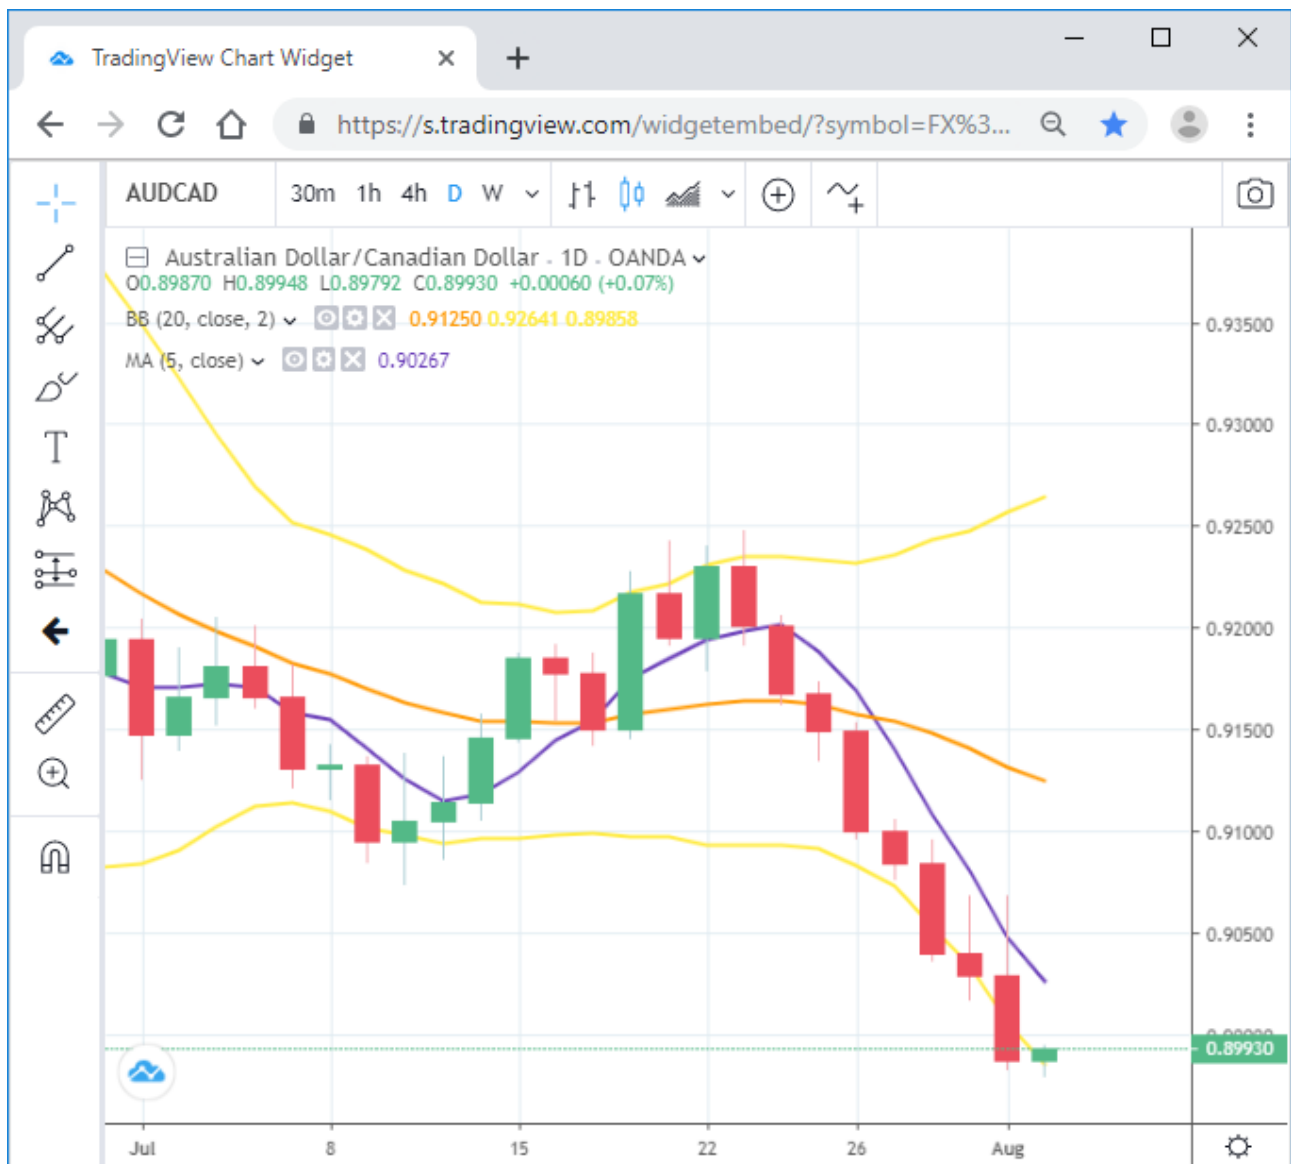

AUDUSD red bearish

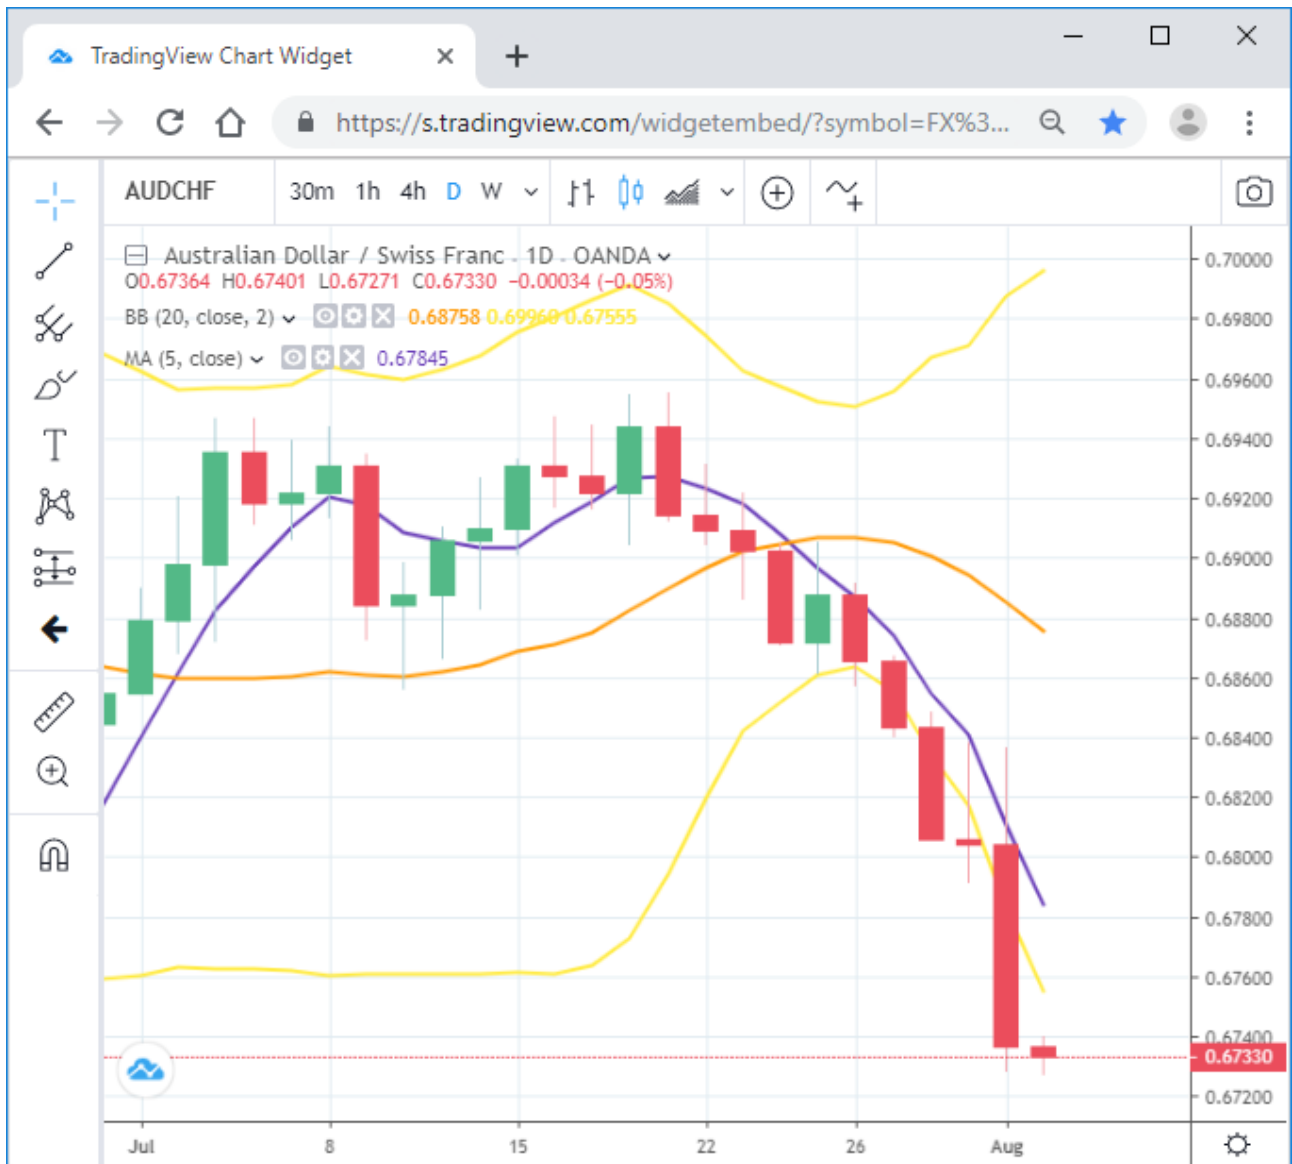

We go down to the stronger USD and over to weaker AUD and put x

AUD JPY red bearish We go down to JPY over to AUD and put x

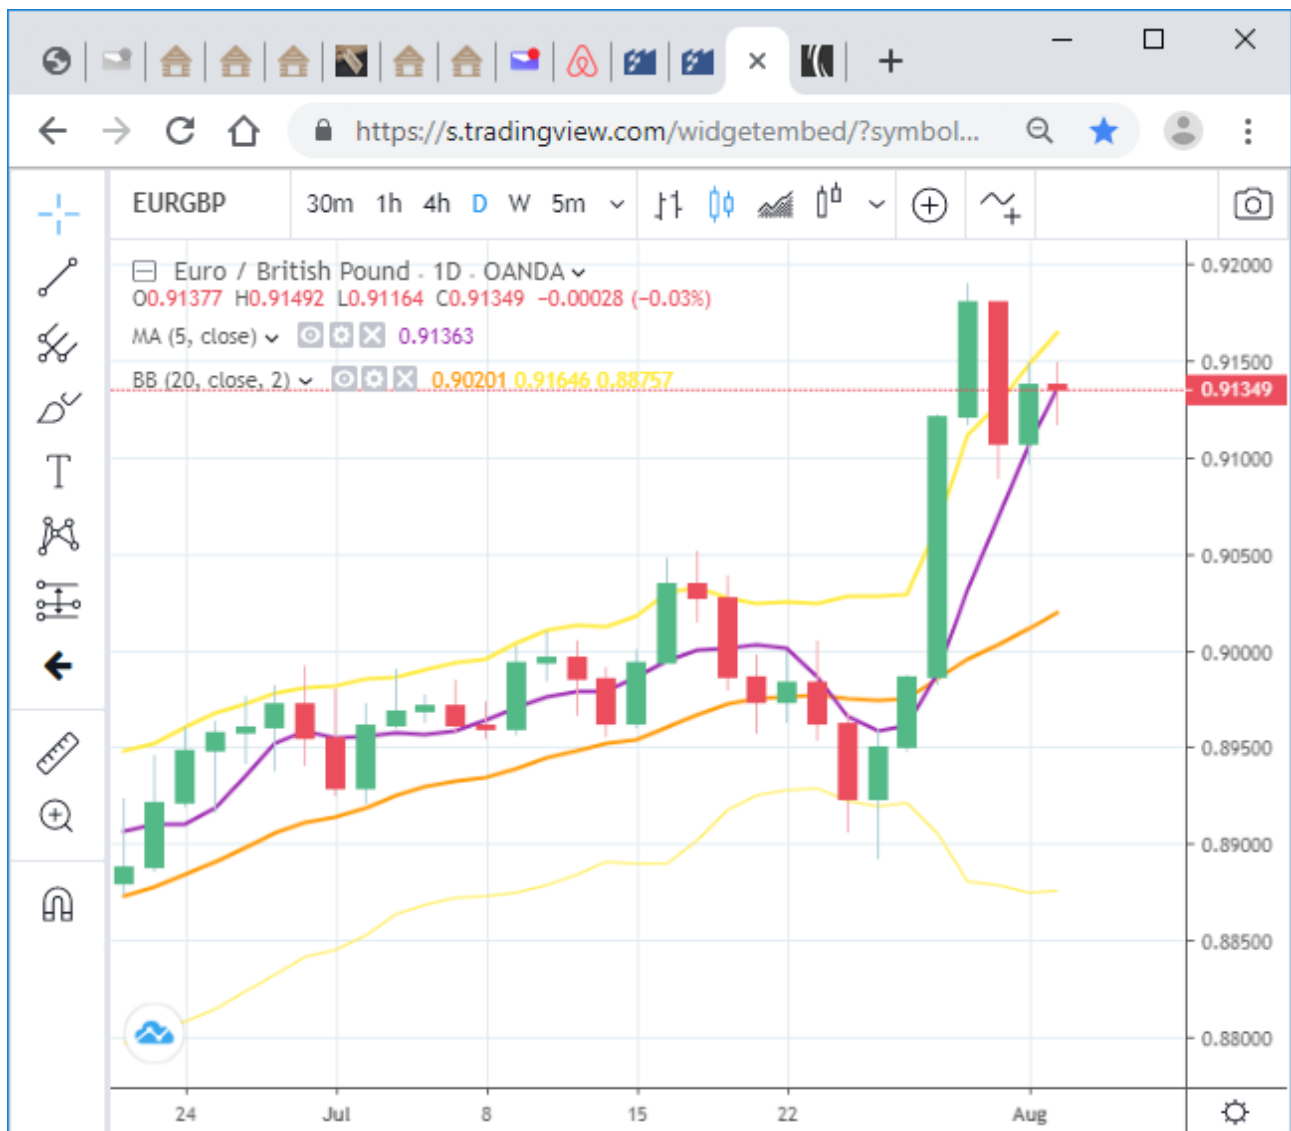

EURGBP Green bullish We go down to EUR over to GBP and put x
