

SYNERGY

Trading Method

Disclaimer

Unique experiences and past performances do not guarantee future results.

Trading stocks, options and Forex spot currencies involves substantial risk; and there is always the potential for loss. Your trading results may vary.

No representation is being made that any software or training will guarantee profits or not result in losses from trading.

SYNERGY Method

EUR/USD 1 Hour – Active Trader

SYNERGY Method

EUR/USD 1 Hour – Active Trader

Why the SYNERGY Method?

Mark Douglas, author of Trading in the Zone, states:

“The best traders have developed an edge and more importantly, they trust their edge.”

Why the SYNERGY Method?

The “*trading edge*” of Synergy:

1. A high degree of probability.
2. Enter and exit trades with less emotions.
3. Trade decisions dictated by price action, not by preconceived beliefs and opinions.

What is SYNERGY?

“Mutually advantageous collaboration of forces to create an enhanced combined result.”

SYNERGY Method

There are 4 primary market conditions
in a potential trade:

1. Price action
2. Trend
3. Momentum
4. Strength

SYNERGY

Basic Indicators

- Average Price Bars
- Price Action Channel
- Traders Dynamic Index

SYNERGY Method

Why Average Price Bars?

- Provide a better depiction of current market.
- Reveal market strength & consolidation.
- Eliminate fluctuations of nominal price action.
- Remove the noise of price distortion of the underlying trend.

Typical Candlesticks

Average Price Bars (APB)

Average Price Bars (APB)

Long Candle

Short Candle

Average Price Bars (APB)

Long Candle

- * Blue Candles signify an uptrend.
- * Blue candles with no lower wick indicates a strong uptrend.

Average Price Bars (APB)

Short Candle

- * Red candles signify a downtrend.
- * Red candles with no upper wick indicates a strong downtrend.

Average Price Bars (APB)

Long Candle

Short Candle

Small Body candles

“Small Body” candles surrounded by upper and lower wicks indicate a potential trend change or reversible.

Consider exiting if in a position, or waiting for confirmation to enter.

Price Action Channel (PAC)

- Provides overall trend direction.
- Reveals periods of consolidation.
- Use as an Entry target.
- And, use it like a Trailing Stop.

Price Action Channel (PAC)

Traders Dynamic Index (TDI)

A hybrid indicator developed to indicate market conditions related to *trend direction*, *momentum*, and *market volatility*.

*An “all-in-one” indicator representing
Market Sentiment!*

Traders Dynamic Index (TDI)

RSI Price (Green) Line

Green > 50 = Positive sentiment ... (Buyers buying)

Green < 50 = Negative sentiment ... (Sellers selling)

Traders Dynamic Index (TDI)

Trade Signal (Red) Line

Rules: Trade **Long** when **Green** > **Red**.

Trade **Short** when **Green** < **Red**.

Exit trade when **Green** & **Red** crossover.

Traders Dynamic Index (TDI)

Traders Dynamic Index (TDI)

Market Base (Yellow) Line

Rules: *Market Base Line (MBL) is the Overall Trend.*
Trade **Long** when **Green** is > **Yellow** line.
Trade **Short** when **Green** is < **Yellow** line.

Traders Dynamic Index (TDI)

Volatility Band (Blue) Lines

*Rules: Possible to add to a **Long** when **Green** is > **VB**.
Possible to add to a **Short** when **Green** is < **VB**.
Consider exit when **Green** crosses back over **VB**.*

SYNERGY

Trading Method

“Basic Entry Rules”

SYNERGY Method

Basic Entry Rules

Long Entry: (*All conditions are satisfied.*)

1. APB haClose > PAC High Moving Average.
2. APB & PAC trending up.
3. TDI = **RSI PL** > 50, **TSL**, and **MBL**.

Short Entry: (*All conditions are satisfied.*)

1. APB haClose < PAC Low Moving Average.
2. APB & PAC trending down.
3. TDI = **RSI PL** < 50, **TSL**, and **MBL**.

SYNERGY

Trading Method

“Basic Exit Rules”

SYNERGY Method

- APB Long exit
Positive bar is much shorter than the previous bar or changes to a negative bar at close.
- PAC Long exit
APB closes inside the channel.
- TDI Long exit =
 1. Green crosses back below Red to the downside.
 2. Green > 68 on small timeframes.
 3. Green crosses back below the upper Volatility Band to the upside.

SYNERGY Method

➤ APB **Short** exit

Negative bar is much shorter than the previous bar or changes to a positive bar at close.

➤ PAC **Short** exit

APB closes inside the channel.

➤ TDI **Short** exit

1. **Green** crosses back over the **Red** to the upside.
2. **Green** < 32 on small timeframes.
3. **Green** crosses back up over the lower Volatility Band.

Understanding Money Management

➤ Margin

“Margin is only how much it costs you to place the trade.”

➤ Leverage

“Leverage is the equity in your account divided by the volume of the positions traded.”

➤ Consistency

“Stay in the game with Consistency, Discipline, Patience, and Low Leverage trading.”
