

Usd Chf - From theory to reality

By Mathieu

On Art of Trade.

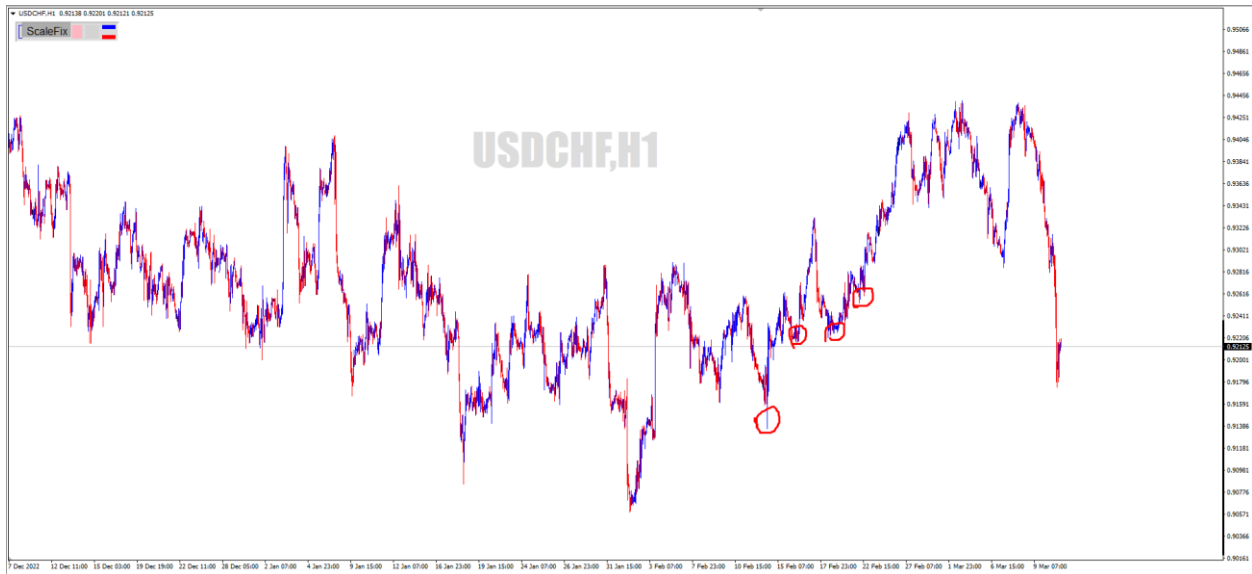

Hi readers , today we want to talking about usd-chf and the way which i look to it .
on Feb 3 , I say long term buy on Usd Chf . (https://t.me/Art_of_trade1/403)

And we see the result after a month !

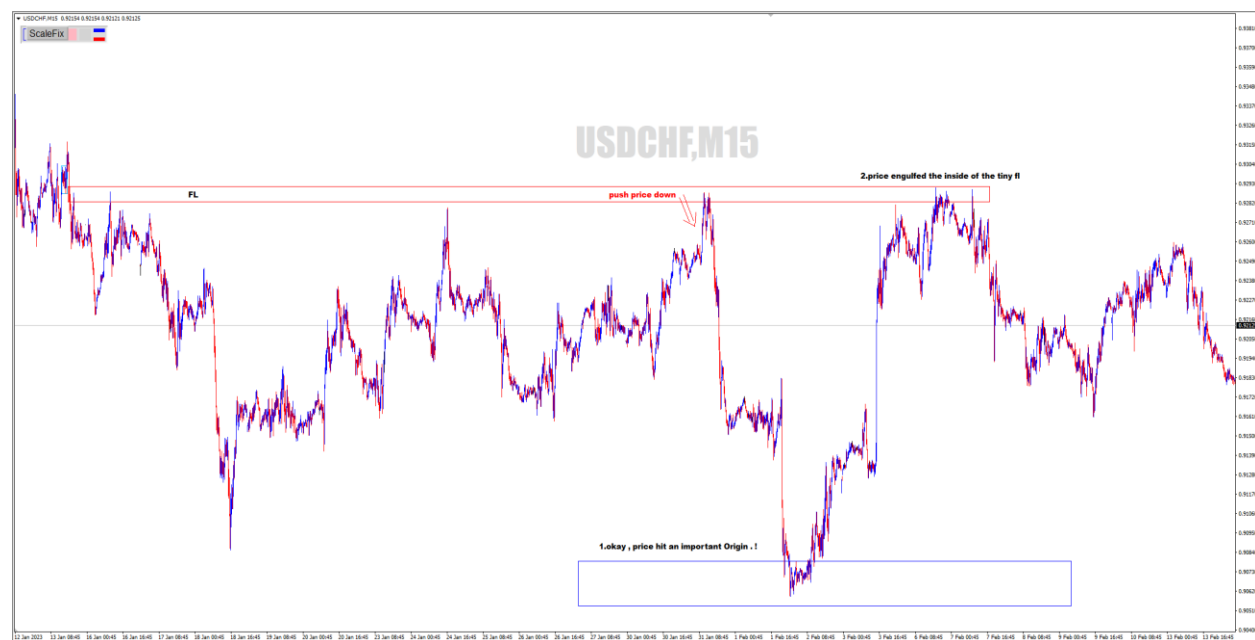

First of all, the reason for my decision was the important Origin that the price had reached.

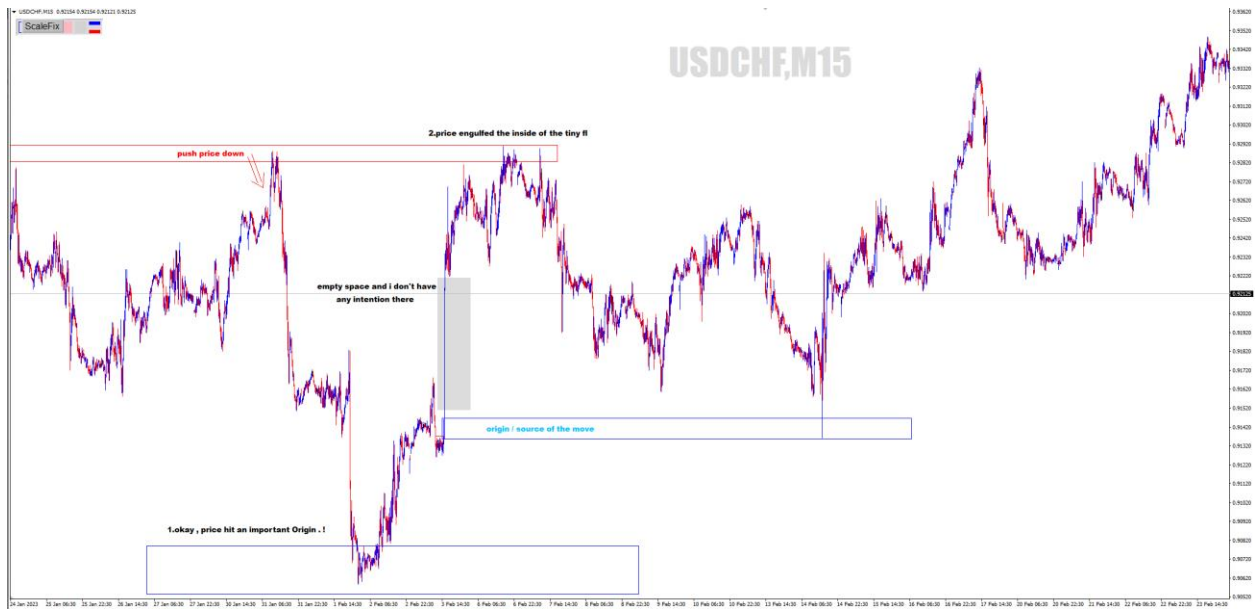

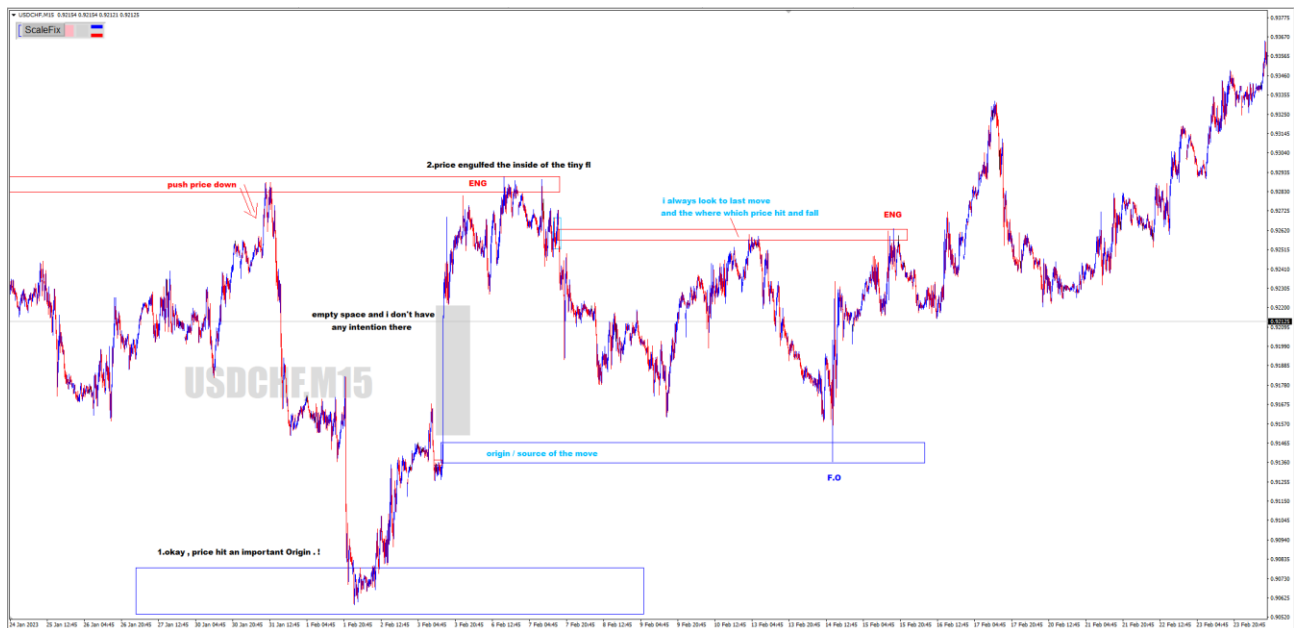

This red circles is the place with good R/R and we looking for trade on them .

Let see how we can do trade on this spots.

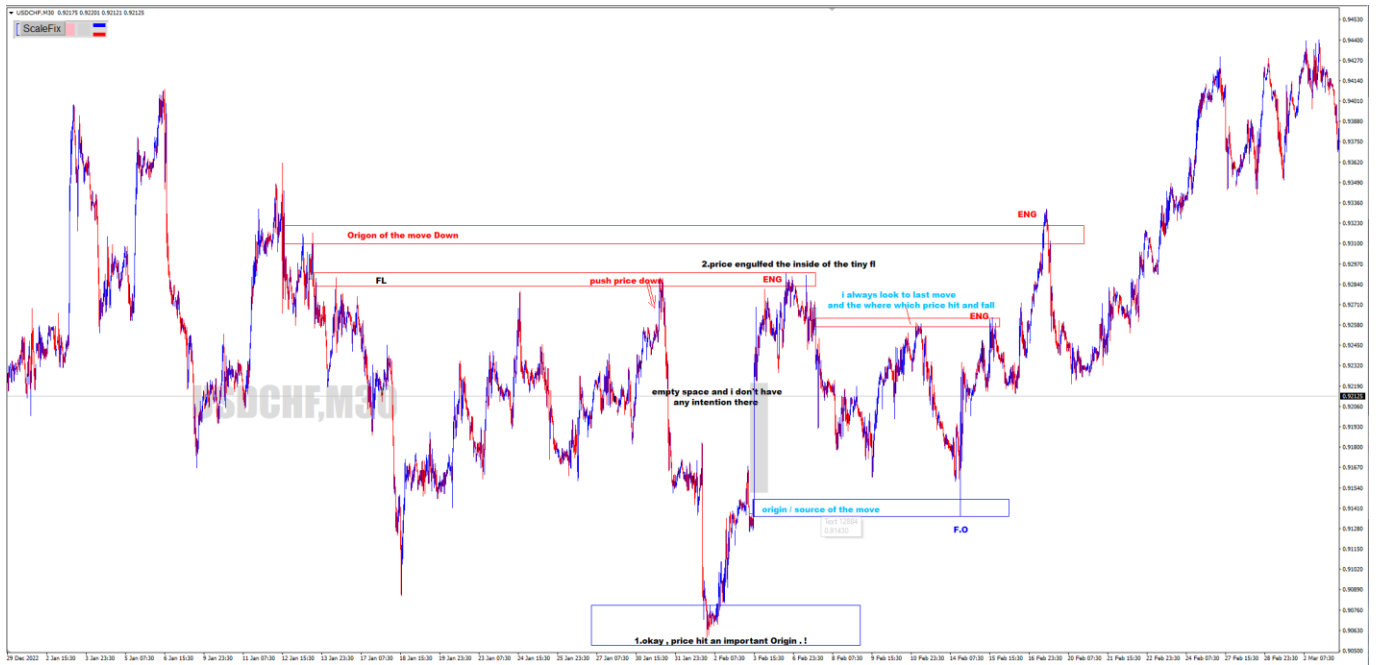

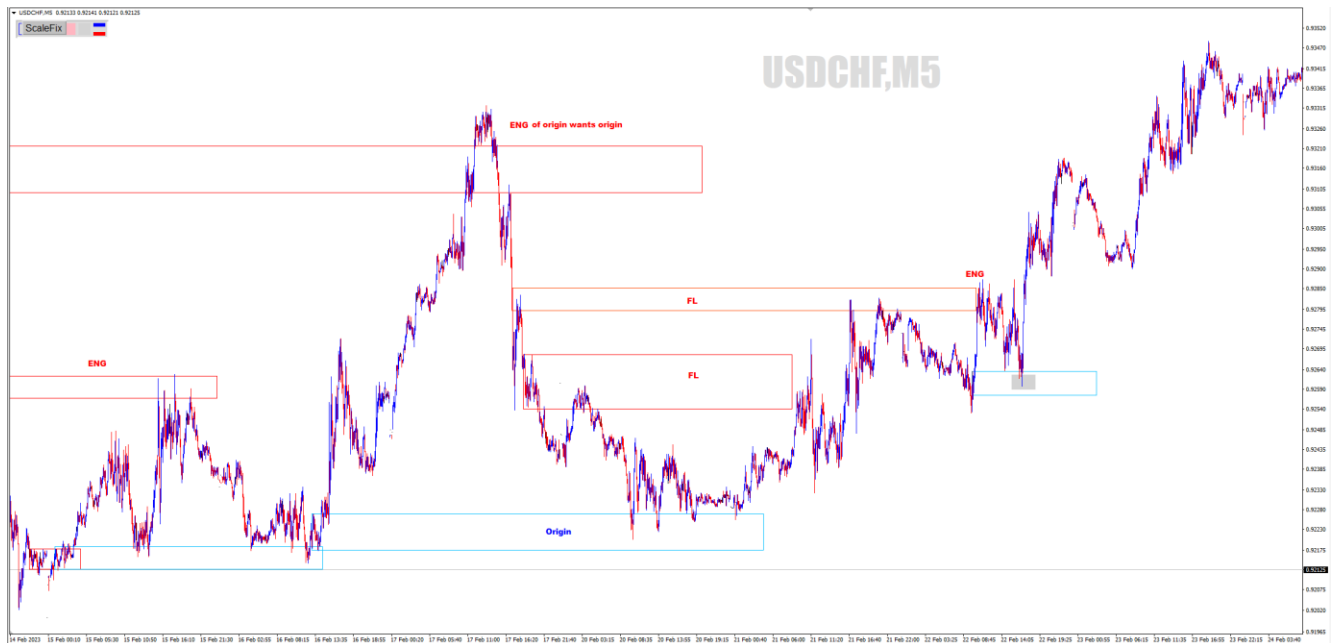

So this origin of the move is the first place that we can use for our entry but if you lose that like me, don't be nervous, let's see what I did and how you can use if you lost a place.

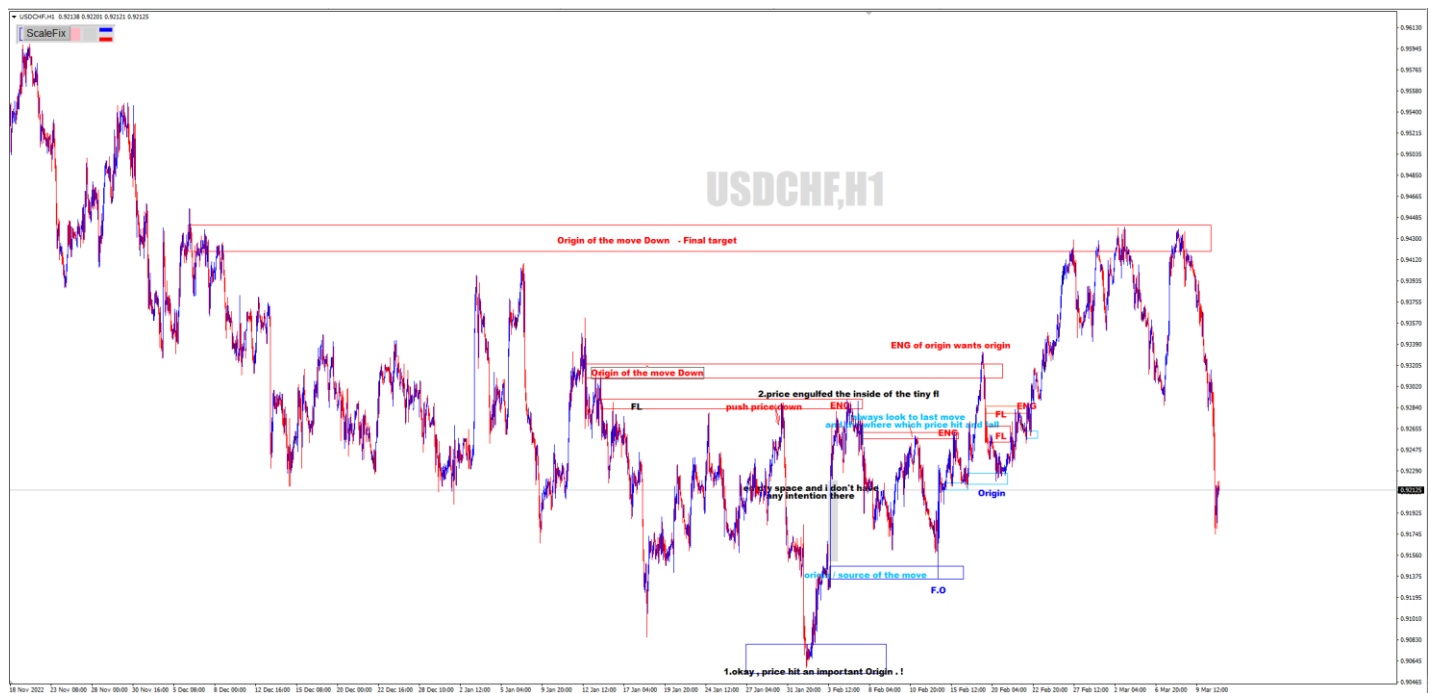

let back to the big picture and see where we are now ..

price again engulfed the higher time frame origin and then need a deep retrace .

I had some more trades on usdchf too but I choose some of them and mention them on this pdf .

Good luck readers !

Regards
