

VOL NO.03

MARKET STRUCTURE

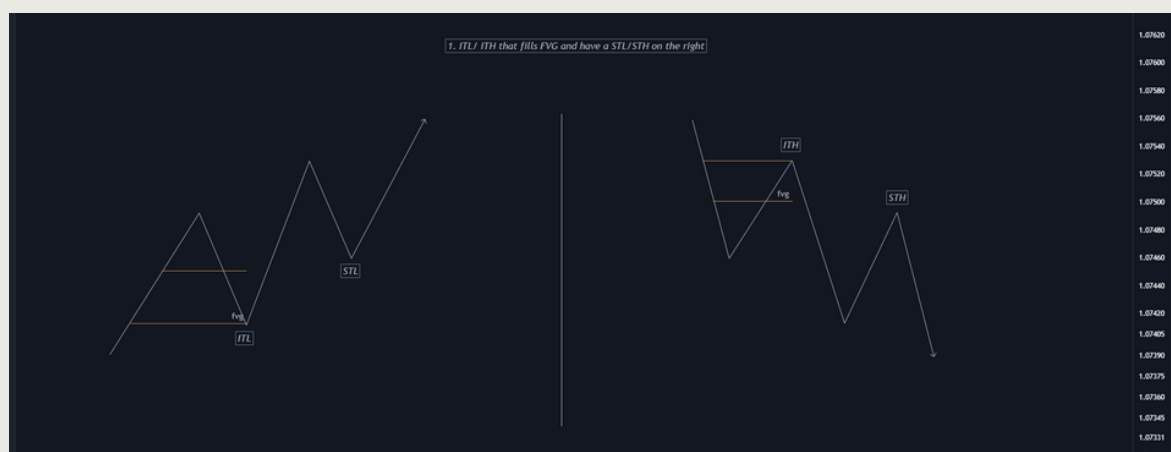

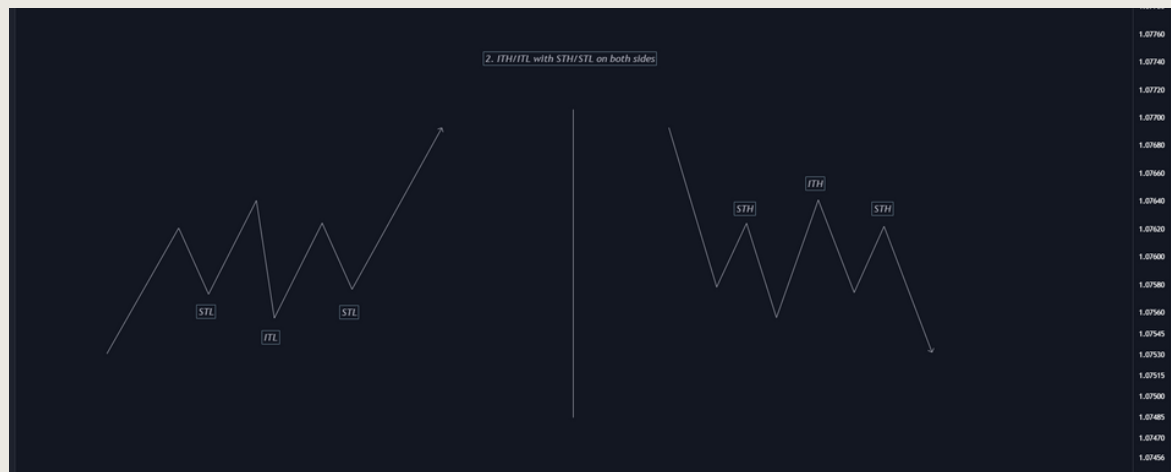

THE TRUE MARKET STRUCTURE SHIFT

In this volume, we will discuss about how to find the "true" MSS.
(P.S: If you can't see what's written on the pictures, you can zoom in by
holding CTRL+ mouse scroll)

You can't always trust a simple MSS, so, if you want to improve your winrate and/or your strategy, you better know how to find the "true MSS". What you want to look for instead of just breaking a structure, is for it to break through a ITH/ITL (Intermediate Term High/Low).

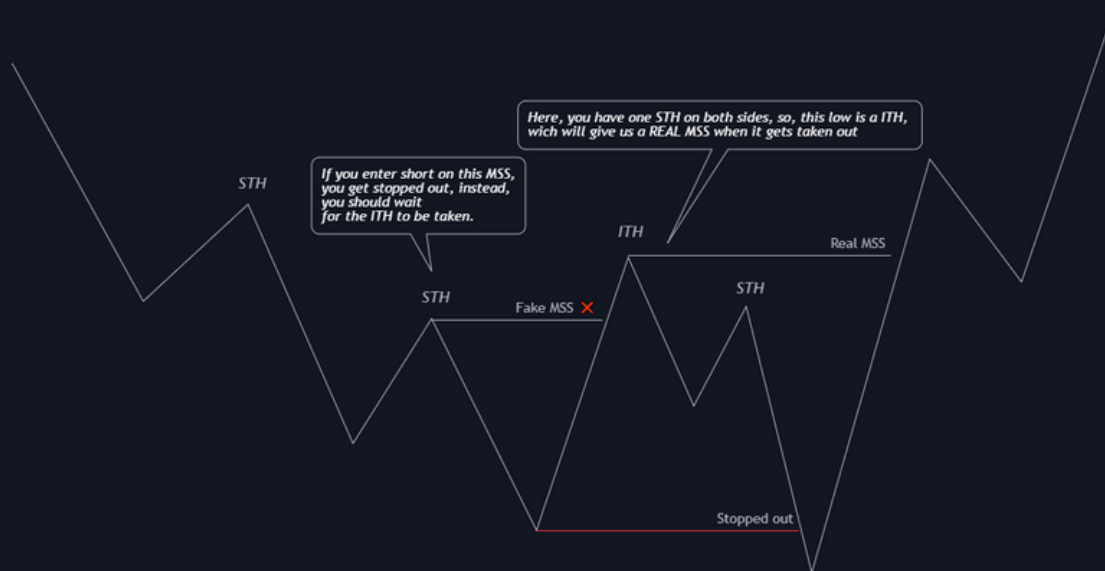

So first what is a ITH/ITL?

A ITH/ITL is either a H/L with a STH/STL (Short Term High/Low) on both sides or a High/Low that goes back into a FVG.

For example:

You should wait for the ITH/ITH to be taken out instead of the STL/STH

You should wait for the ITH/ITH to be taken out instead of the STL/STH
