

OKEHIEDON GANN SYSTEM

INTRODUCTION

OVERVIEW

The okehiedon Gann System is based on the principle, buy low and sell high off the 4hr Chart and also incorporates some form of trend trading by buying the dips in an uptrend and selling the rallies in a downtrend based on a 4hr, 30/15 min MTF strategy

OVERVIEW

Please note that the GU Intraday system is a subset of the Okehiedon Gann System which is solely traded on the GU Pair on the 15 min or 30 min time frame without recourse to the trend on the Higher Time Frames.

OVERVIEW

The Gann Swing System consist of 3 strategies

a. The 4hr swing system

b. MTF Gann System. (4hr, 30/15 min tf)

c. GU Intraday System

OVERVIEW

The 4hr swing and MTF can be traded on all currency pairs.

- 4. Stop loss – 10 pips above swing high**
- 5. Take profit –First Target at risk, Move stop to Break Even and Target major support or OBOS gives buy signal or price closes above gann**

SWING ENTRY 4 HR CHART

For conservative traders you can decide to use the swing entry to join the daily trend and add positions. So you would only be taken trades in the direction of the daily chart.

MTF STRATEGY 4HR ,30 MIN CHART

Buy Signal

- 1. Price above Gann 5 on 4hr chart**
- 2. Stoch not overbought**
- 3. OBOS has not given sell signal.**
- 4. Go to the 30 min chart using the same template and buy all the dips in the direction of the 4hr chart as indicated by the gann 30 min system.**
- 5. For aggressive entries you can buy the OBOS signal with stoch supporting the trade in the direction of the 4hr trend. Sell Signal is vice versa**
