NON-REPAINT LIVE CHART READING PROTOCOL

M5 & M30 Observation & Execution Logic

LIVE MARKET EDUCATION EDITION

Real-Time Observation • Zero Repaint • No Hindsight

◆ WHAT THIS DOCUMENT REPRESENTS

✓ Live chart reading methodology ✓ Non-repaint signal behavior explanation ✓ Structure, flow, and confirmation logic ✓ Designed for **LIVE broadcast & professional manuals**

IMPORTANT NOTE

This material is strictly for **educational demonstration**. It does **not** provide trade calls, predictions, or financial advice.

NEXTELLIOTT CORE PRINCIPLES

• Observe — don't anticipate • Respect structure • Follow signal hierarchy • Confirmation over prediction

<div style="text-align:center; margin-top:40px; font-size:14px; opacity:0.8;">© NEXTELLIOTT — Educational Use Only</div>

HOW TO READ & TRADE THE M5 GOLD (XAUUSD) LIVE CHART

NEXTELLIOTT — Non-Repaint Trading System (LIVE Demonstration)

 **Important:** This is a **LIVE educational demonstration**. No future prediction — only **real-time signal interpretation**.

◇ **ARROW STRENGTH HIERARCHY (MOST IMPORTANT RULE)**

Not all arrows are equal. **Trade logic always follows arrow strength priority.**

STRONGEST SIGNAL

BIG RED & SMALL RED Arrow

- Highest probability
- Appears at **major exhaustion, reversal, or continuation zones**
- Usually aligns with **structure break, volatility expansion, or band extreme**
- **Primary decision-making arrow**

 When this arrow appears, **all weaker arrows become secondary**

SECOND STRONGEST

MAGENTA Arrow

- Strong trend continuation or reversal confirmation
- Appears after **price compression or pullback**
- Works best when aligned with higher-timeframe direction

 Trade only **with structure**, not against strong momentum

THIRD STRONGEST

WHITE Arrow

- Momentum shift
- Early entry or continuation signal
- Best used as **confirmation**, not as a standalone decision

 Combine with trend direction and band positioning

FOURTH STRONGEST

BLUE Arrow

- Reaction or scalp-level signal
- Often appears near **support / resistance or band touch**
- Lowest priority

 **Never trade BLUE arrows alone** against stronger arrows

◇ HISTOGRAM FILTER — ARROW CONFIRMATION TOOL

The histogram displayed at the bottom of the chart acts as a **filter**, adding **extra confirmation and structural context** to arrow signals.

◇ Histogram Color Meaning

- **Green bars** → Buy pressure / Bullish flow
- **Red bars** → Sell pressure / Bearish flow

The histogram does **not repaint** and must always be read **together with arrows**, never on its own.

☑ ARROW + HISTOGRAM CONFIRMATION RULES

🌀 *Strong BUY Confirmation (Support Zone)*

- A **BUY arrow** appears
- The histogram bar is **RED** at the same time

➡ Indicates **strong SUPPORT** ➡ Selling pressure is exhausting and buyers are reacting from support

🌀 *Strong SELL Confirmation (Resistance Zone)*

- A **SELL arrow** appears
- The histogram bar is **GREEN** at the same time

➡ Indicates **strong RESISTANCE** ➡ Buying pressure is exhausting and sellers are reacting from resistance

◇ FILTER 1 & FILTER 2 RULES (ADDITIONAL CONFIRMATION)

- **Filter 2:** Red line over Lime line → early bearish signal, almost pinpoint
- **Filter 1:** Aqua line slower; when Red line (Filter 2) over Lime line, shows early bearishness
- Arrow coming over **Filter 1 Green bar** → early sell signal, almost pinpoint
- When Filter 1 Aqua line crosses above 6 or below -6 → high caution; volatile opposite moves expected anytime
- **All Buy arrows must be ignored** when Filters 1 and 2 show bearishness
- **All Sell arrows must be ignored** when Filters 1 and 2 show bullishness

🔑 **Important:** Filters act as confirmation and caution tools. Arrows remain the primary decision reference, but extreme moves require additional vigilance.

◇ LIVE CHART READING SEQUENCE (VERY IMPORTANT)

STEP 1: OBSERVE — DO NOT ANTICIPATE

- Arrows **do not repaint**
- Wait for the arrow to **fully appear and close**
- No guessing, no prediction

STEP 2: IDENTIFY MARKET STATE

Observe:

- Price slope
- Volatility expansion or contraction
- Band direction (trend vs range)

Ask:

Is price trending, pulling back, or exhausting?

STEP 3: CHECK ARROW + HISTOGRAM + FILTERS ALIGNMENT

- Arrow strength comes first
- Histogram confirms **support or resistance**
- Filter 1 & 2 confirm early bearish or bullish bias
- Strongest setups occur when **all agree**

STEP 4: ALIGN WITH STRUCTURE

Best conditions occur when:

- Arrow appears at **band extremes**
 - Arrow aligns with **previous swing high / low**
 - Multiple arrows agree in the same direction
 - Histogram and filters confirm absorption
-
-

◇ HOW TO HANDLE CONFLICTING SIGNALS (LIVE RULE)

Situation	Action
Red vs Blue	Follow RED only
Magenta vs White	Follow MAGENTA
Blue alone	Observe only
Mixed arrows	Wait — no rush

➔ **No trade is also a professional decision**

◇ WHAT THIS LIVE BROADCAST IS FOR

NEXTELLIOTT — LIVE MARKET DEMONSTRATION

- Shows **true non-repaint behavior**
 - No hindsight editing
 - No fake screenshots
 - No disappearing arrows
 - Pure **live market observation**
-

◇ IMPORTANT DISCLAIMER (LIVE EDUCATION)

No trade calls No buy/sell instructions No signal selling No account management

Educational demonstration only Learn how signals behave in real time Learn patience, structure, and confirmation

LIVE BROADCAST MESSAGE (READ ALOUD)

“What you see here is a **non-repaint system**. Once an arrow prints, it stays — forever. No tricks. No repaint. No hindsight.”

HOW TO READ & TRADE THE M30 GOLD (XAUUSD) LIVE CHART

NEXTELLIOTT — Non-Repaint Trading System (LIVE Demonstration)

 **Important:** This is a **LIVE educational demonstration**. No future prediction — only **real-time signal interpretation**.

◇ **ARROW STRENGTH HIERARCHY (MOST IMPORTANT RULE)**

Not all arrows are equal. **Trade logic always follows arrow strength priority.**

STRONGEST SIGNAL

BIG RED & SMALL RED Arrow

- Highest probability
- Appears at **major exhaustion, reversal, or continuation zones**
- Usually aligns with **structure break, volatility expansion, or band extreme**
- **Primary decision-making arrow**

 When this arrow appears, **all weaker arrows become secondary**

SECOND STRONGEST

MAGENTA Arrow

- Strong trend continuation or reversal confirmation
- Appears after **price compression or pullback**
- Works best when aligned with higher-timeframe direction

 Trade only **with structure**, not against strong momentum

THIRD STRONGEST

WHITE Arrow

- Momentum shift

- Early entry or continuation signal
- Best used as **confirmation**, not as a standalone decision

→ Combine with trend direction and band positioning

🏆 **FOURTH STRONGEST**

🌀 **BLUE Arrow**

- Reaction or scalp-level signal
- Often appears near **support / resistance or band touch**
- Lowest priority

→ **Never trade BLUE arrows alone** against stronger arrows

◇ **HISTOGRAM FILTER — ARROW CONFIRMATION TOOL**

The histogram displayed at the bottom of the chart acts as a **filter**, adding **extra confirmation and structural context** to arrow signals.

◇ **Histogram Color Meaning**

- ● **Green bars** → **Buy pressure / Bullish flow**

- **Red bars** → Sell pressure / Bearish flow

The histogram does **not repaint** and must always be read **together with arrows**, never on its own.

☑ **ARROW + HISTOGRAM CONFIRMATION RULES**

🌀 **Strong BUY Confirmation (Support Zone)**

- A **BUY arrow** appears
- The histogram bar is **RED** at the same time

➡ Indicates **strong SUPPORT** ➡ Selling pressure is exhausting and buyers are reacting from support

🌀 **Strong SELL Confirmation (Resistance Zone)**

- A **SELL arrow** appears
- The histogram bar is **GREEN** at the same time

➡ Indicates **strong RESISTANCE** ➡ Buying pressure is exhausting and sellers are reacting from resistance

◇ **Why the Histogram Adds Value**

- Confirms **support and resistance absorption**
- Helps avoid chasing late moves
- Improves confidence during live observation
- Strengthens arrow-based decisions with flow context

🔑 **Important:** Histogram is a **filter**, not a signal generator. Arrows remain the **primary decision reference**.

◇ **LIVE CHART READING SEQUENCE (VERY IMPORTANT)**

☑ **STEP 1: OBSERVE — DO NOT ANTICIPATE**

- Arrows **do not repaint**
 - Wait for the arrow to **fully appear and close**
 - No guessing, no prediction
-

☑ STEP 2: IDENTIFY MARKET STATE

Observe:

- Price slope
- Volatility expansion or contraction
- Band direction (trend vs range)

Ask:

Is price trending, pulling back, or exhausting?

☑ STEP 3: CHECK ARROW + HISTOGRAM ALIGNMENT

- Arrow strength comes first
 - Histogram confirms **support or resistance**
 - Strongest setups occur when **both agree**
-

☑ STEP 4: ALIGN WITH STRUCTURE

Best conditions occur when:

- Arrow appears at **band extremes**
 - Arrow aligns with **previous swing high / low**
 - Multiple arrows agree in the same direction
 - Histogram confirms absorption
-

◇ HOW TO HANDLE CONFLICTING SIGNALS (LIVE RULE)

Situation	Action
Red vs Blue	Follow RED only
Magenta vs White	Follow MAGENTA
Blue alone	Observe only
Mixed arrows	Wait — no rush

➡ **No trade is also a professional decision**
