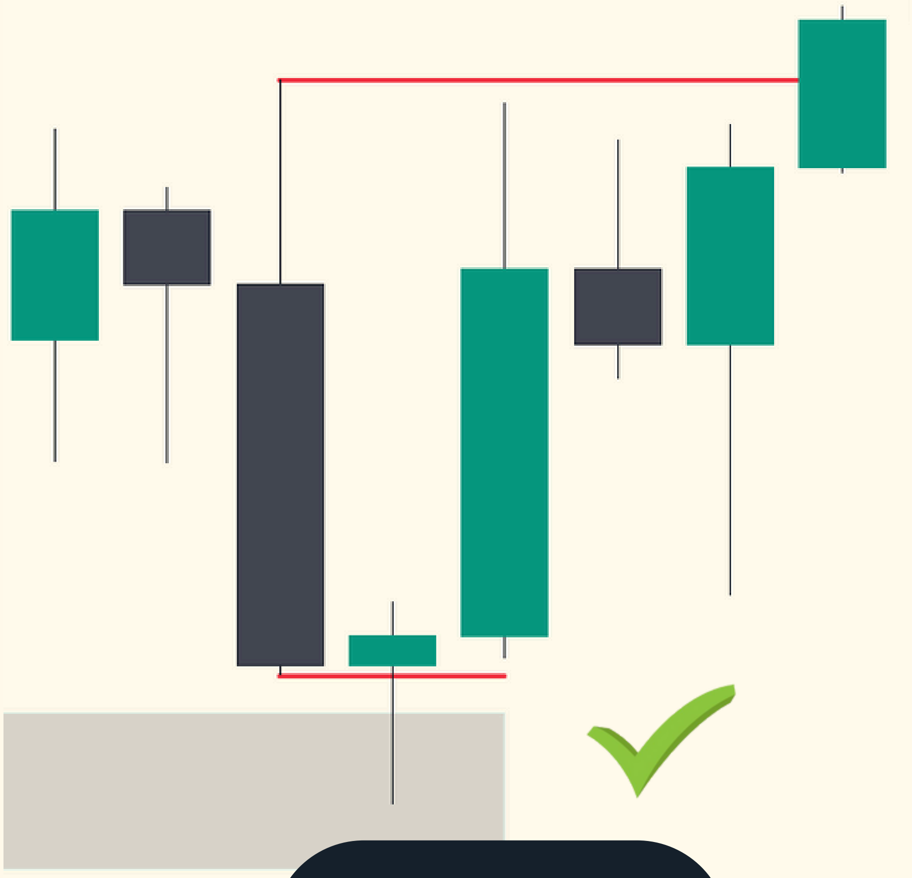
CANDLE RANGE THEORY

How to trade CRT/ TS/ AMD in H4 & H1 ?



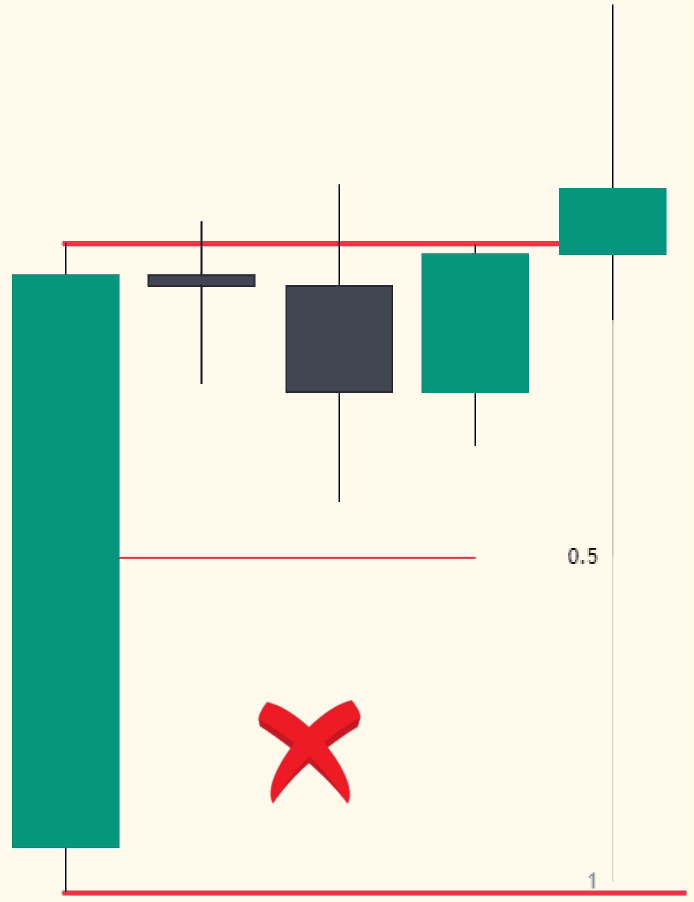
Aug 26-30

XAUUSD

EURUSD

NQ

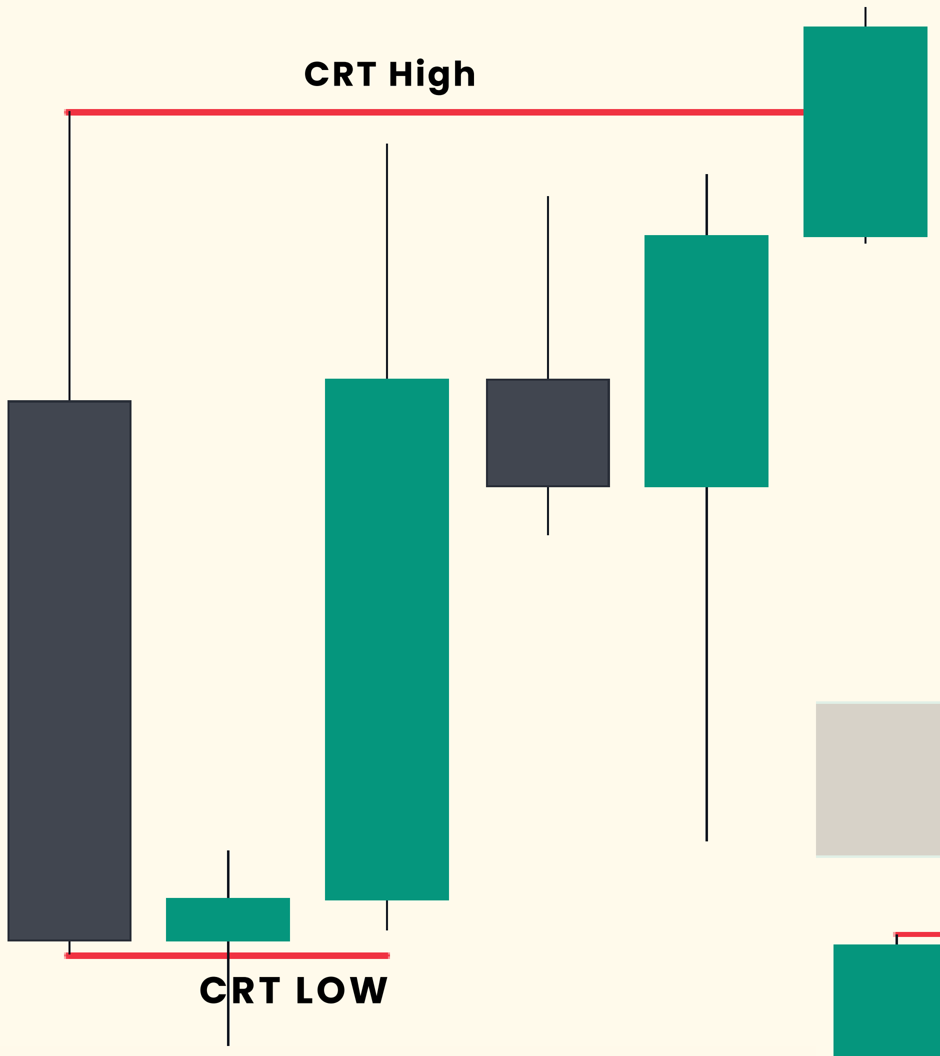
WAIT FOR MANIPULATION &
TRADE THE DISTRIBUTION

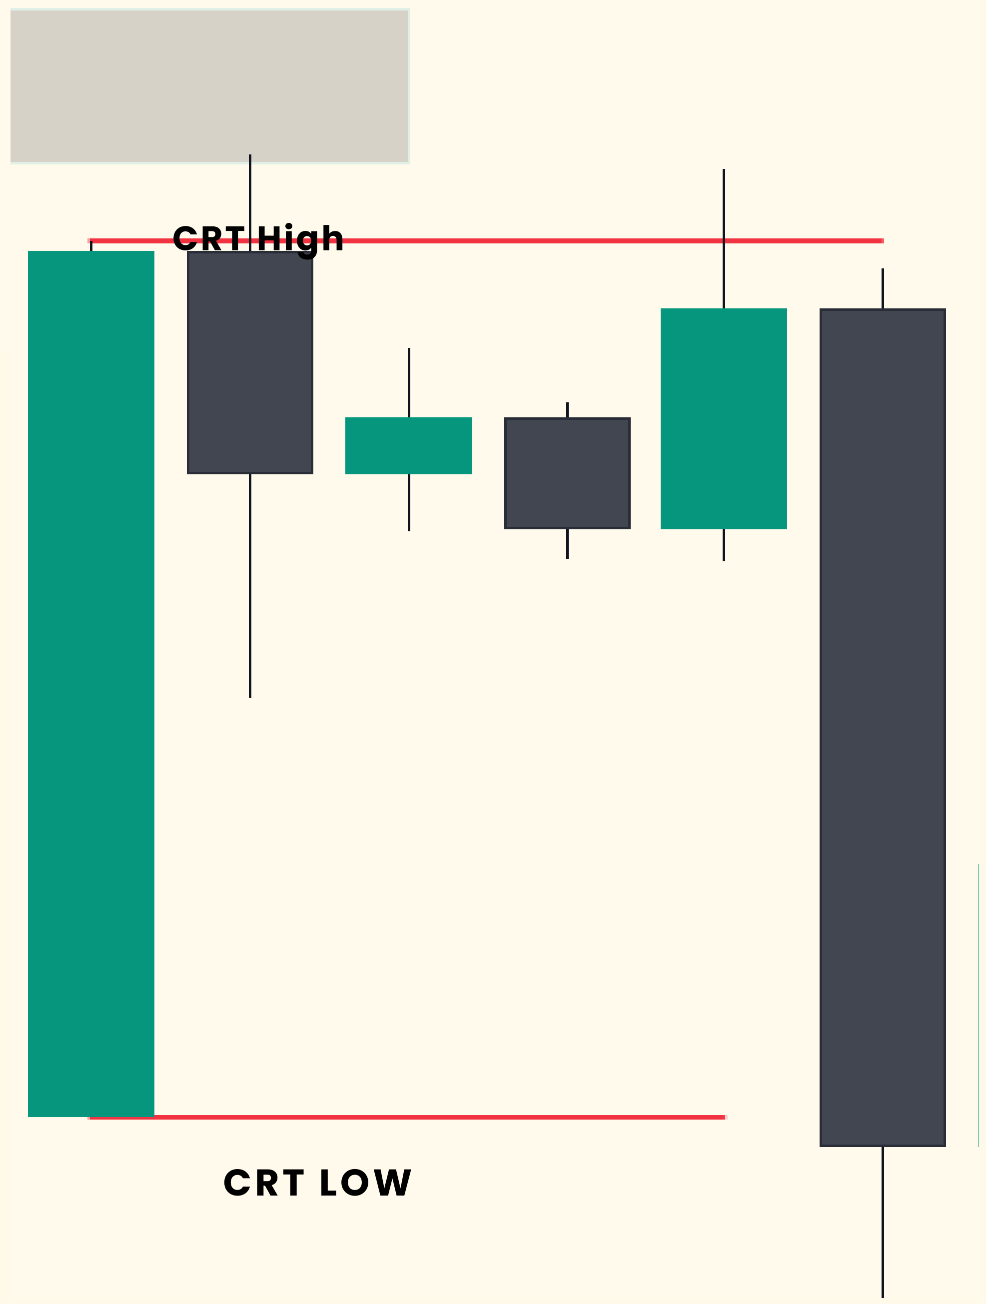


Why pattern Fails

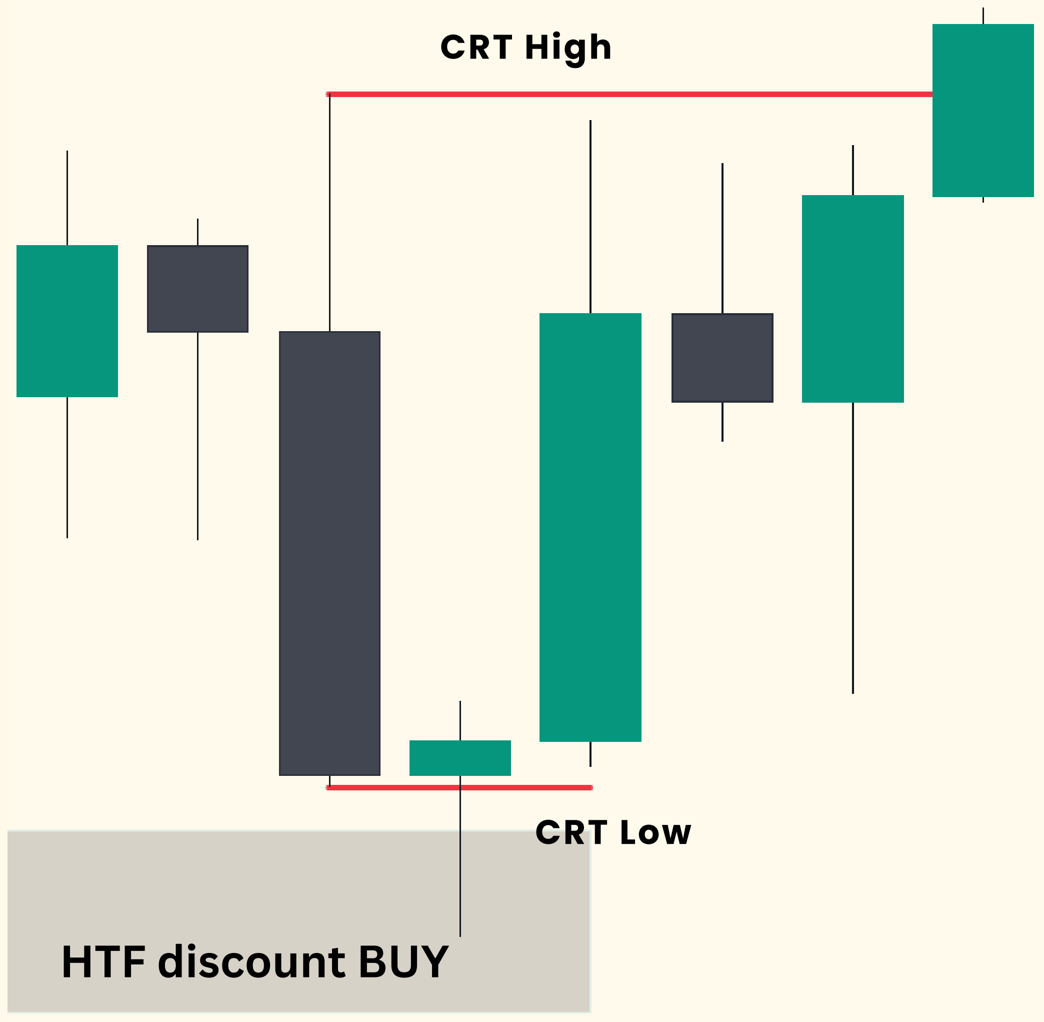
CANDLE RANGE THEORY

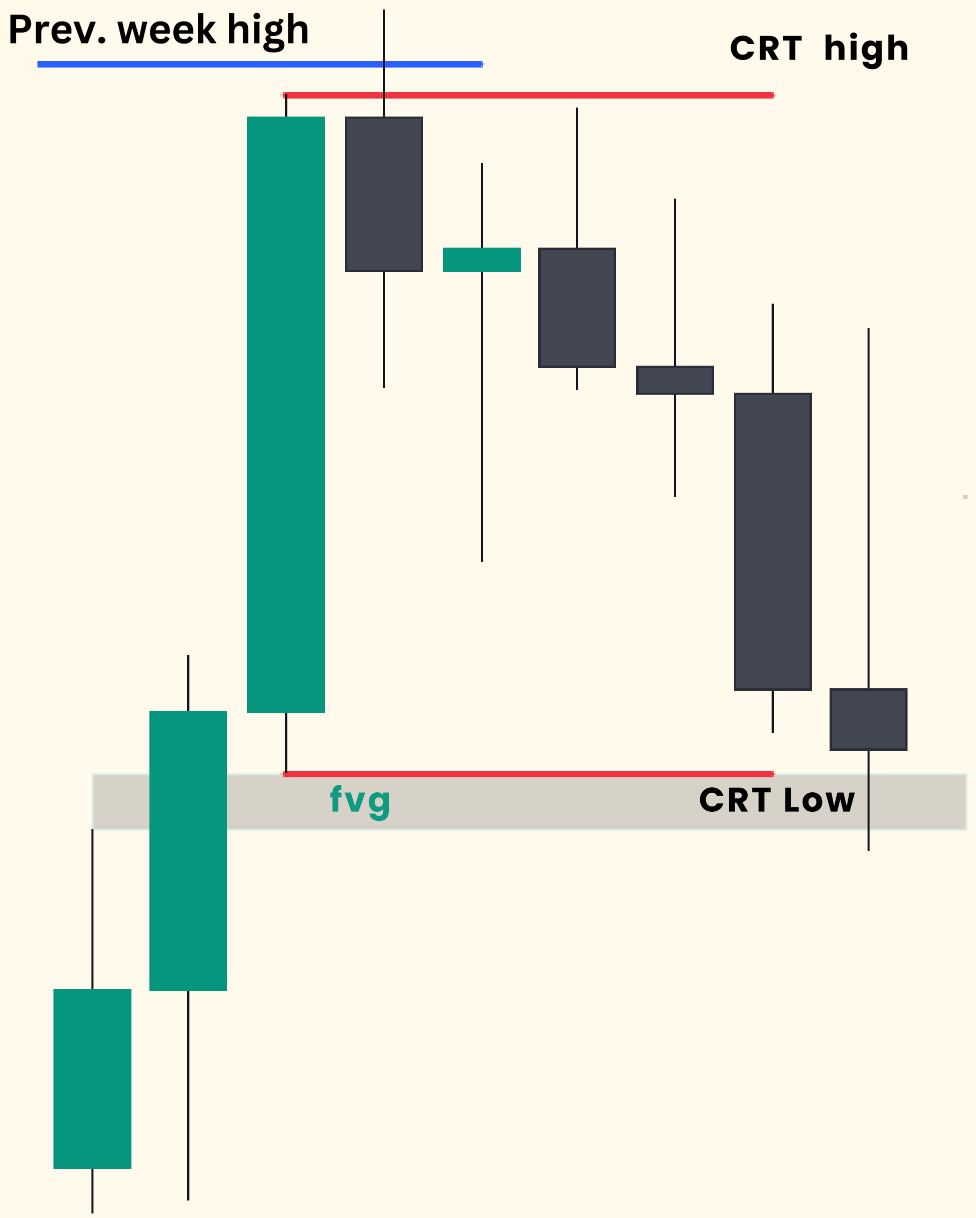
- Each candle is the range. Every candle has its own po3.
- With respect to HTF PD arrays Look for 4hr candle forming at specific time of the day.
- (1am-5am-9am & 2am - 6am - 10am EST)
- Wait for candle to purge the high/low of the 1st candle and then close inside the 1st candle range at the specific time (1-5-9)and look for entries in LTF (TSQ)
- 1hr time frame -High probability TS at 1am - 3am - 6am- 9am EST.
- Wait for manipulation/ purge / TS then trade the next candle.





1. **Before looking the CRT formation one should confirm the higher time frame bias.**
2. **Below CRT low or above the CRT high there should be a ORDER BLOCK OR MITIGATION BLOCK OR BREAKER BLOCK OR FAIR VALUE GAP OR SSL/BSL.**
3. **HIGHER TIME FRAME PREMIUM / DISCOUNT AREA SHOULD BE CONSIDERED. SELL AT THE PREMIUM BUY AT THE DISCOUNT.**





TIME & PRICE

Key timing for TS the CRT high or low

FOREX

4hr timeframe -1am,5am & 9am EST

1hr timeframe - around 1-3am,5-6am & 9-10am EST(high probable)

INDEX FUTURES

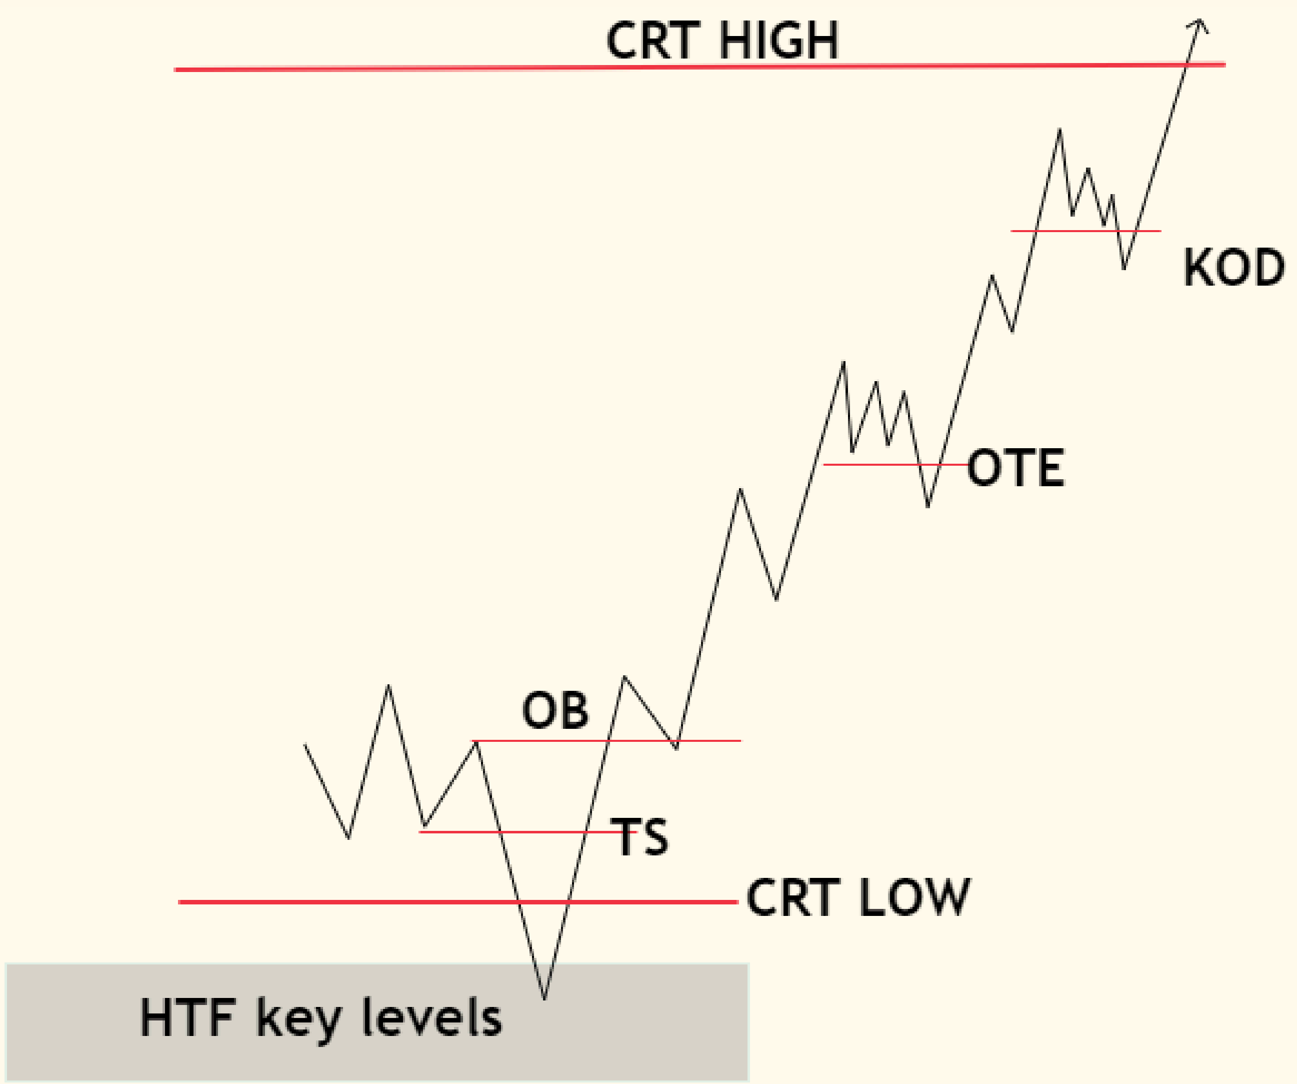
4HR TF- 2am,6am & 10am EST

PATTERN ALONE NEVER WORKS ALWAYS.

WITH HTF BIAS/ KEY LEVELS + TIME+ LOOK FOR PATTERNS

TIME FRAME ALIGNMENTS

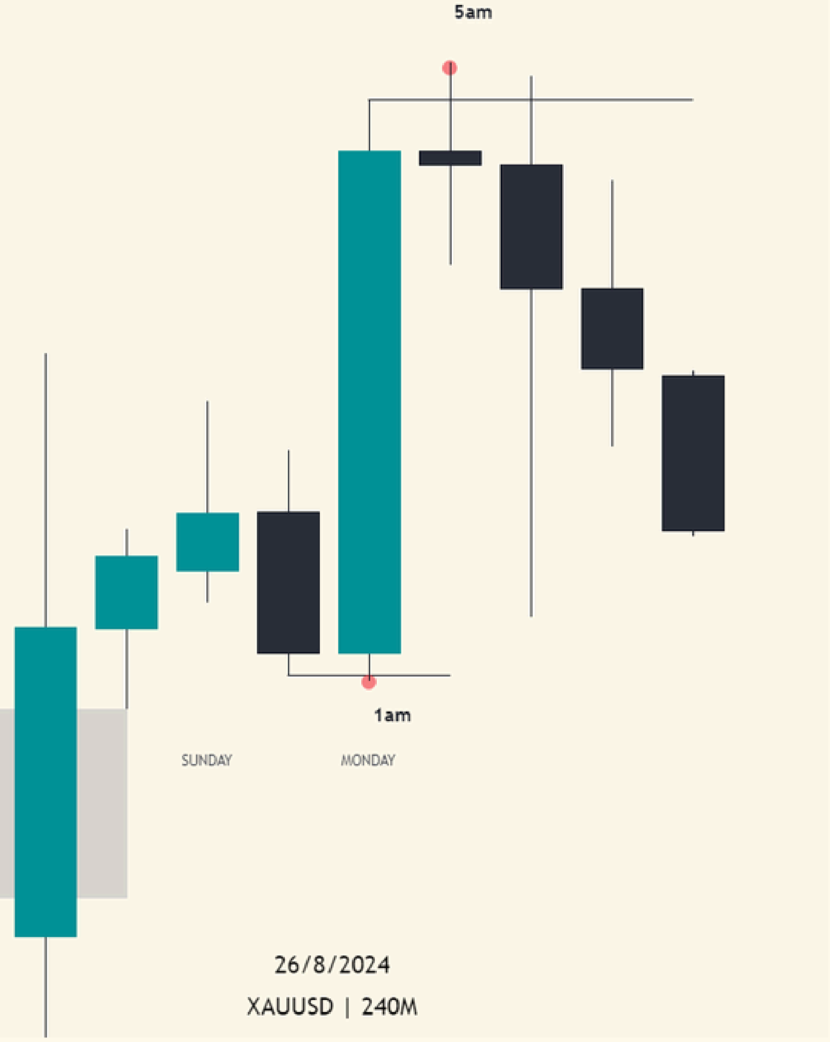
HTF (CRT)	LTF(TSQ)
WEEKLY	4HR
DAILY	1HR
4HR	15MIN
1HR	5MIN



The LTF execution TSQ (The Sequence) include:
- CRT Turtle Soup
- CSD
- OTE
- Continuation
- KOD (Kiss of Death)

Review on XAUUSD

Monday

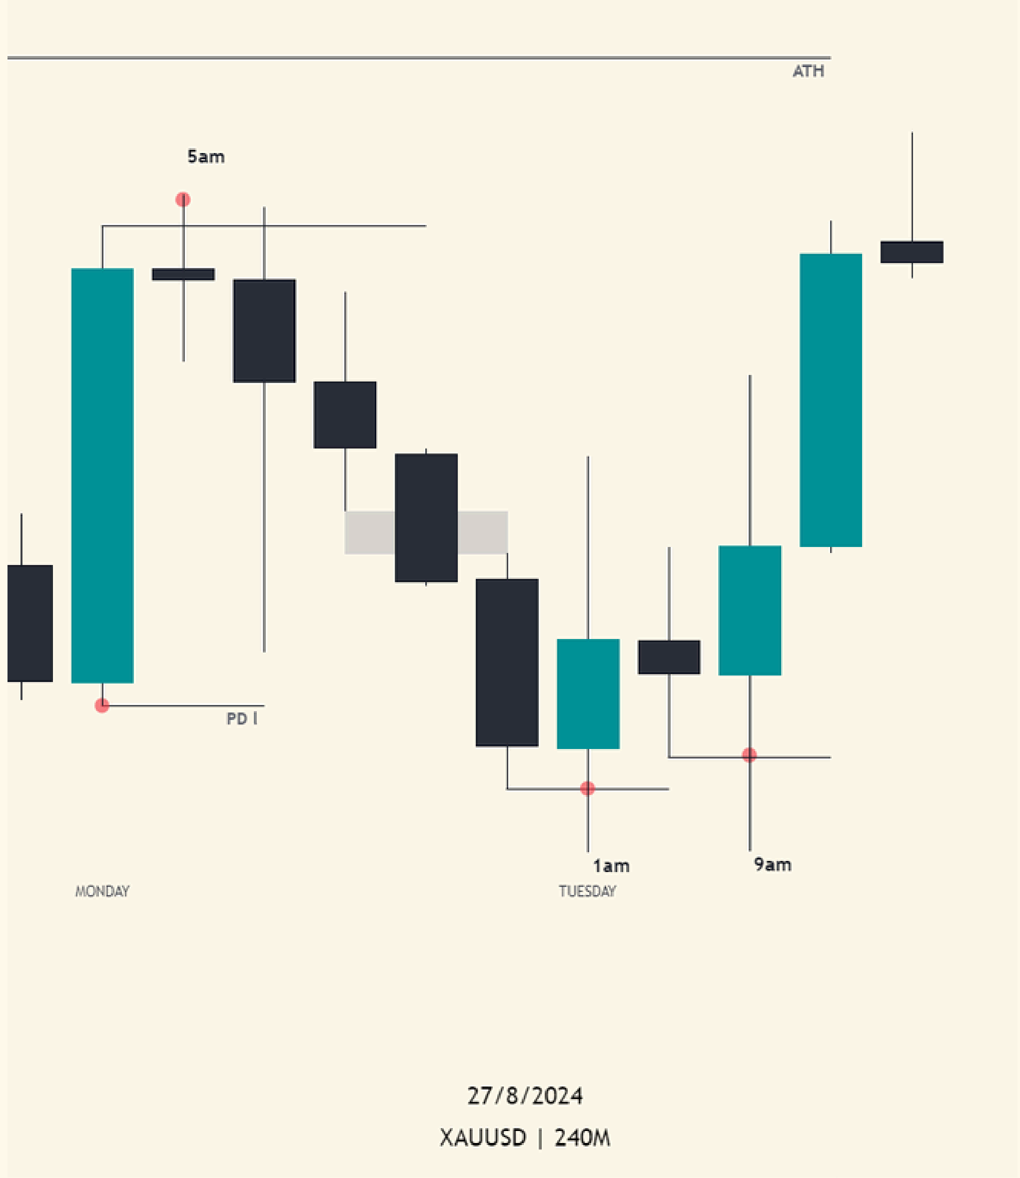


Bullish bias for the Week (anticipation)

- **Monday if there is no red folder news, then low probable to trade.**
- **Monday purge low probable, no distribution in 5am, 9am**

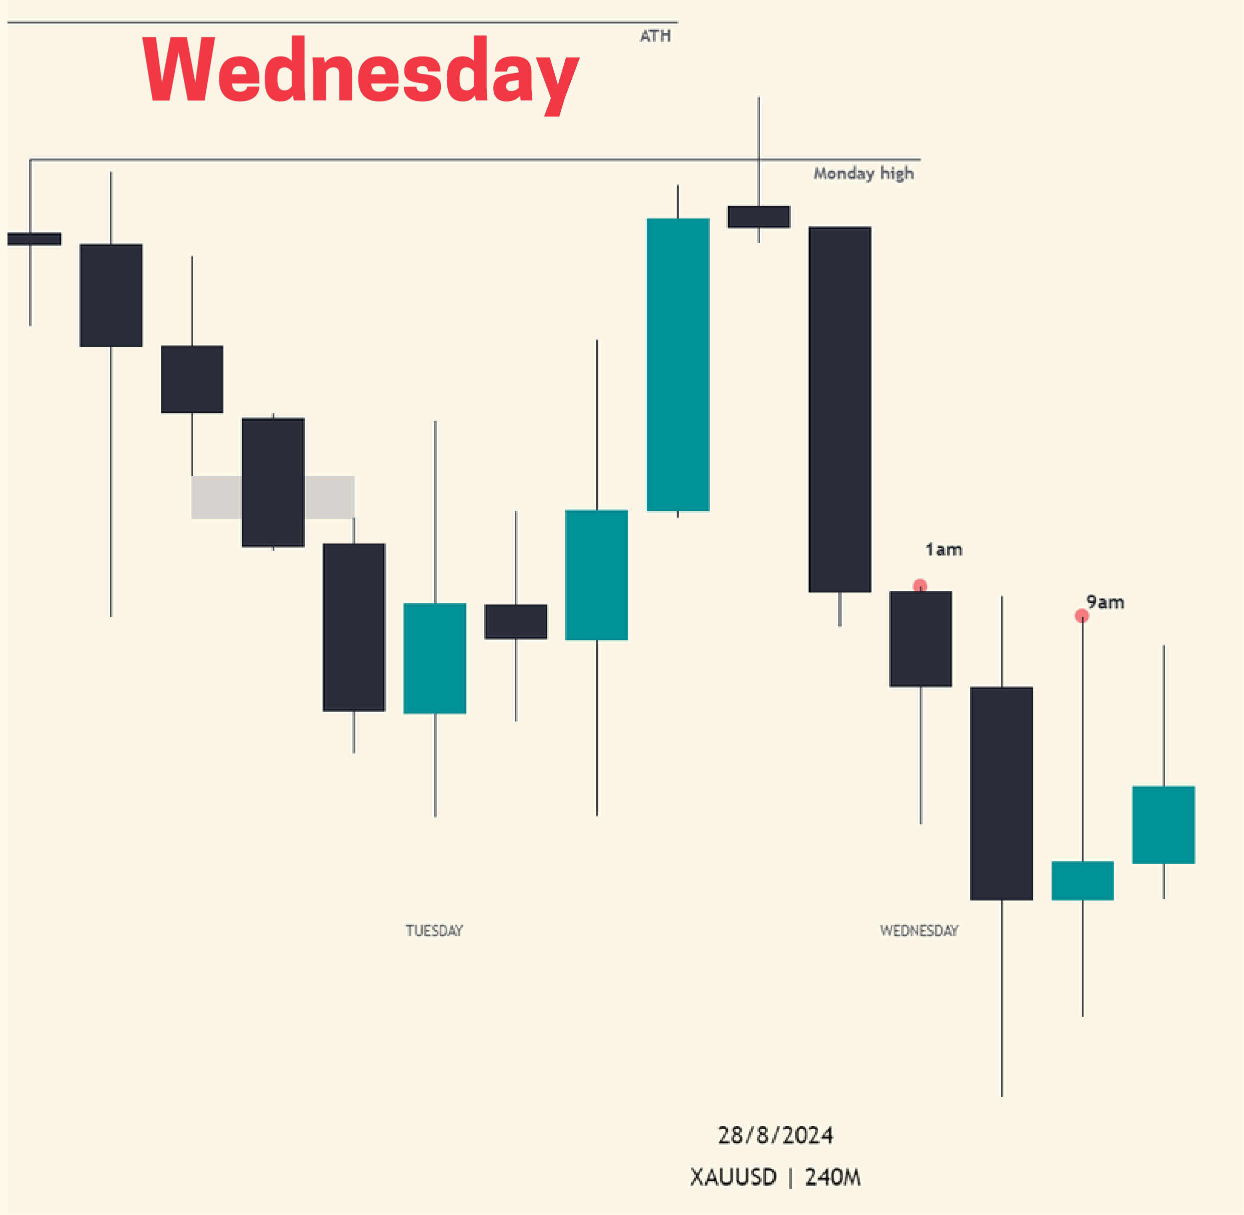
SATYA ♂
@ambeingsatya

Tuesday



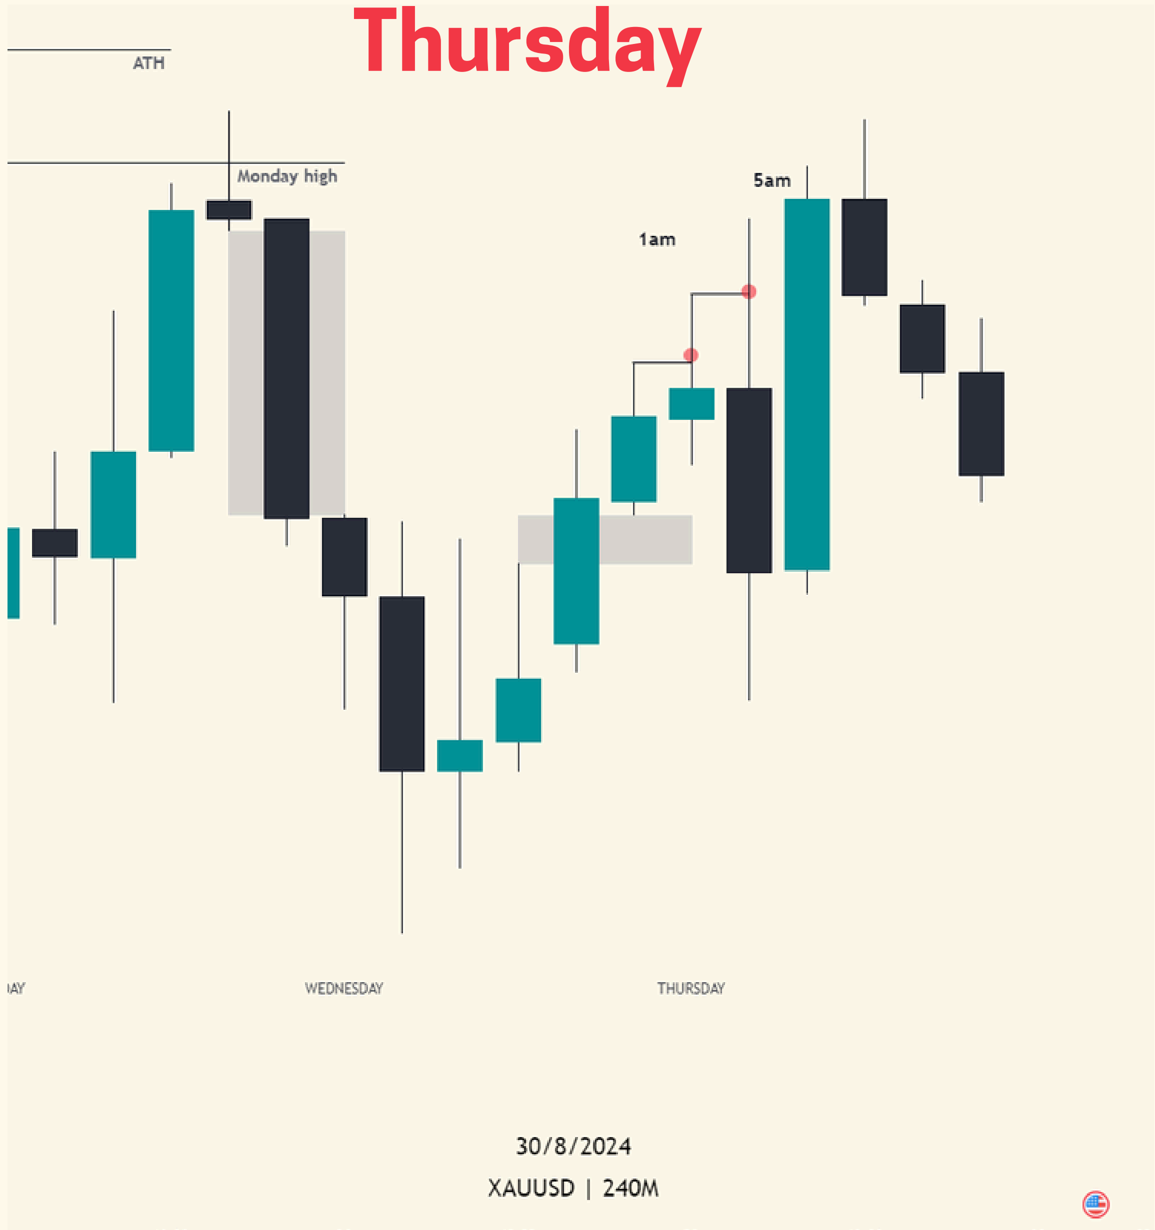
- **PDl + FVG**
- **Purge happens at 1am, H4 fvg retains 5am & 9am distribution**

Wednesday

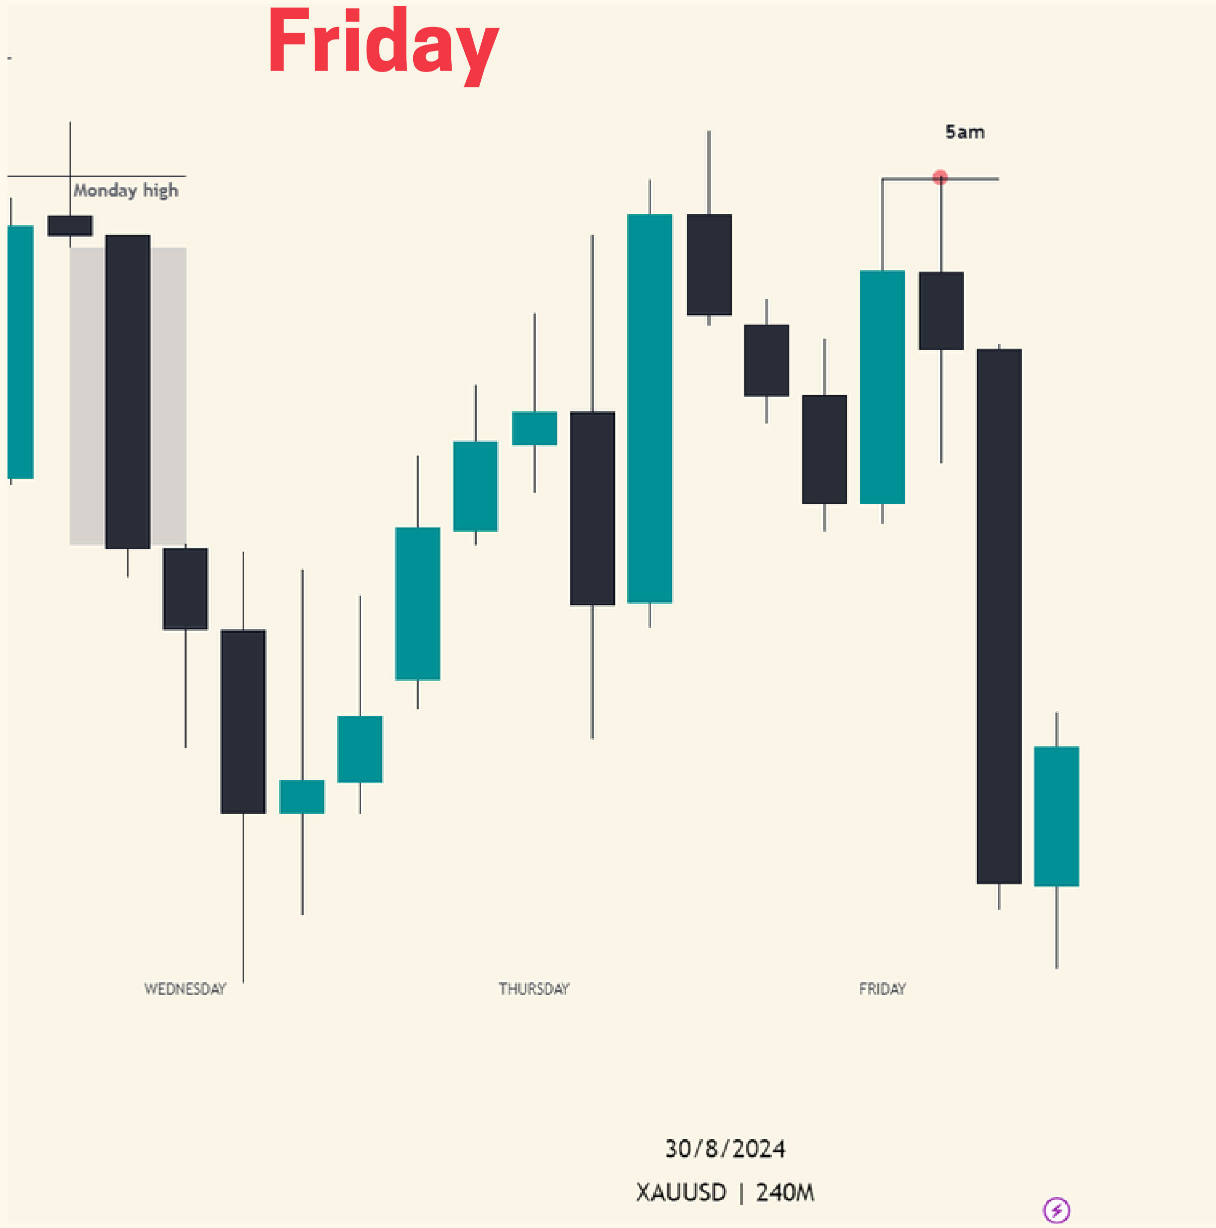


- **Monday high purge and forms SIBI(bearish)**
- **No purge in the AM session, no trades**

Review on XAUUSD



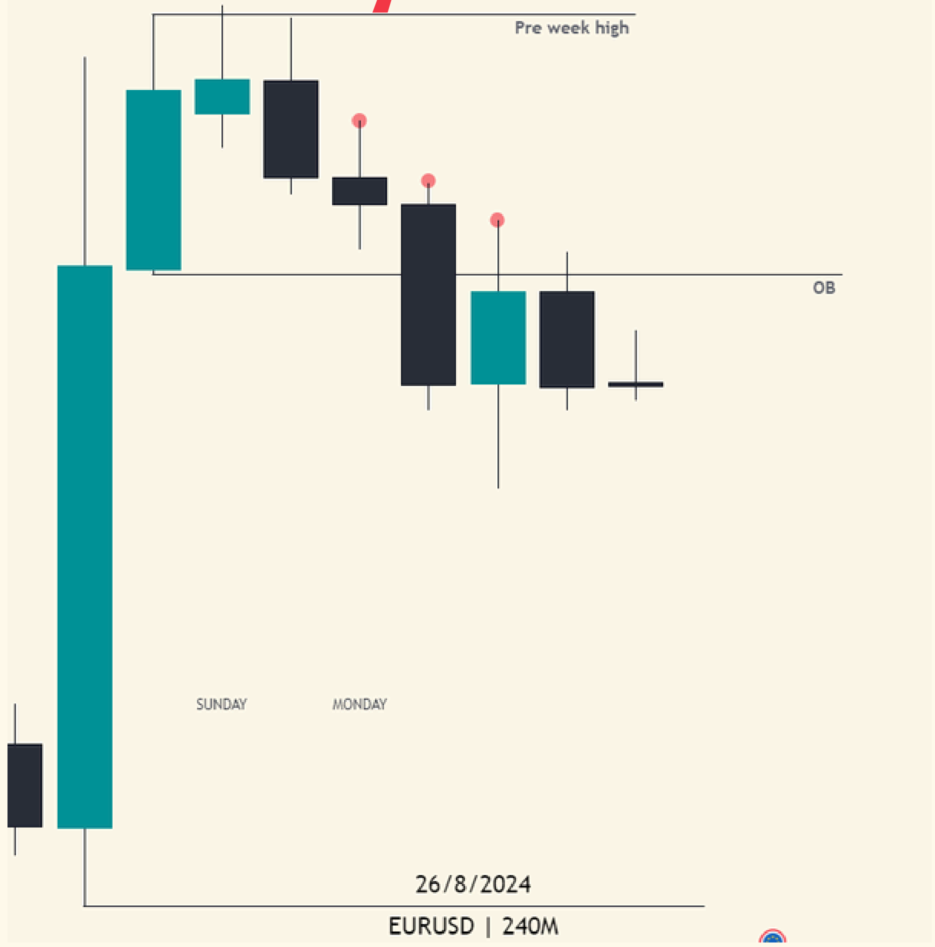
- 1am-5am purge happens, didn't work
- Price rejecting from the Monday high & Tuesday low.
- 1am purge at premium. 5am price rejecting from the discount-low probable day.
- happens when trading around the All time high



- 5am purge happens at premium
- 9am distribution

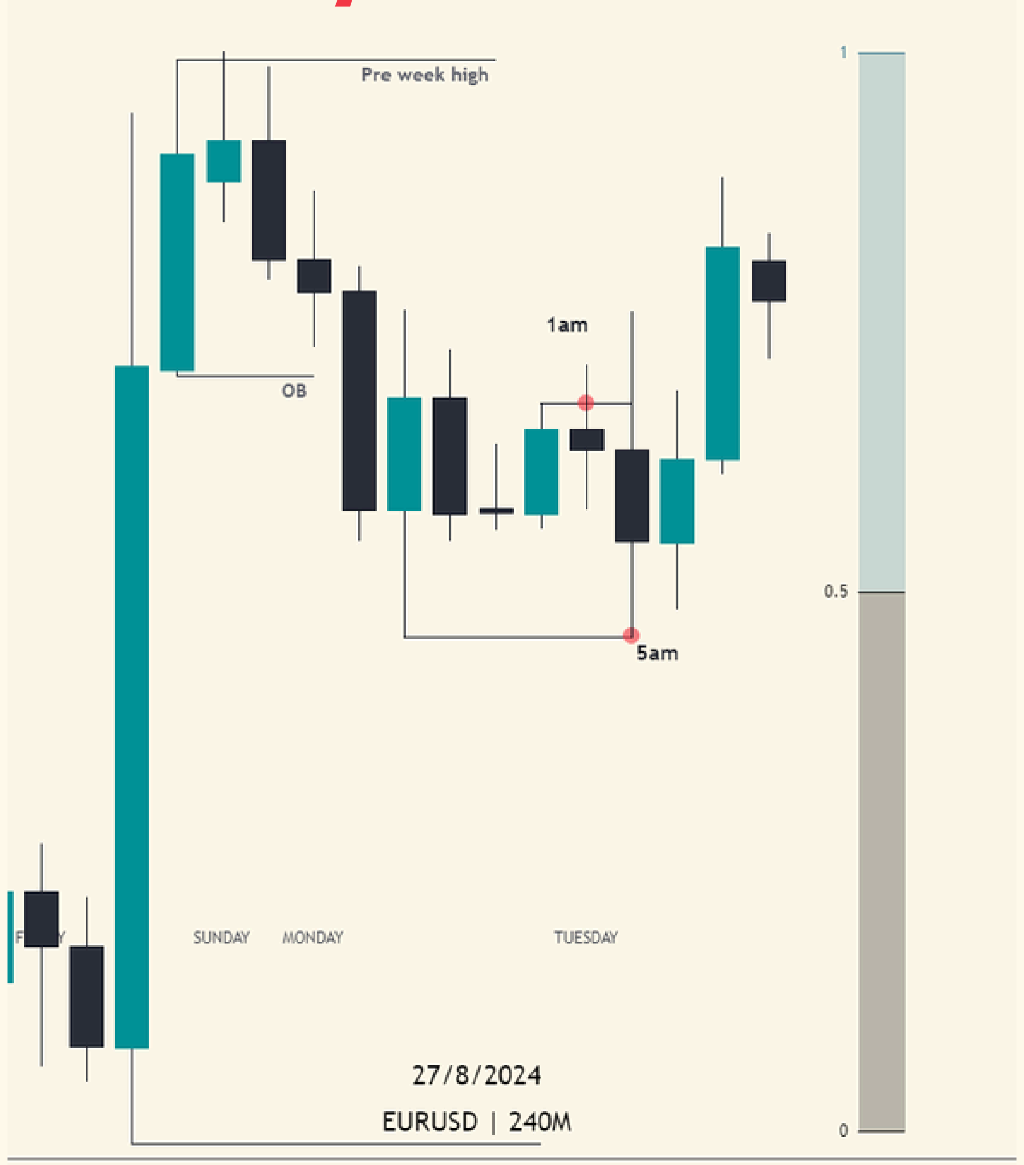
REVIEW ON EURUSD

Monday



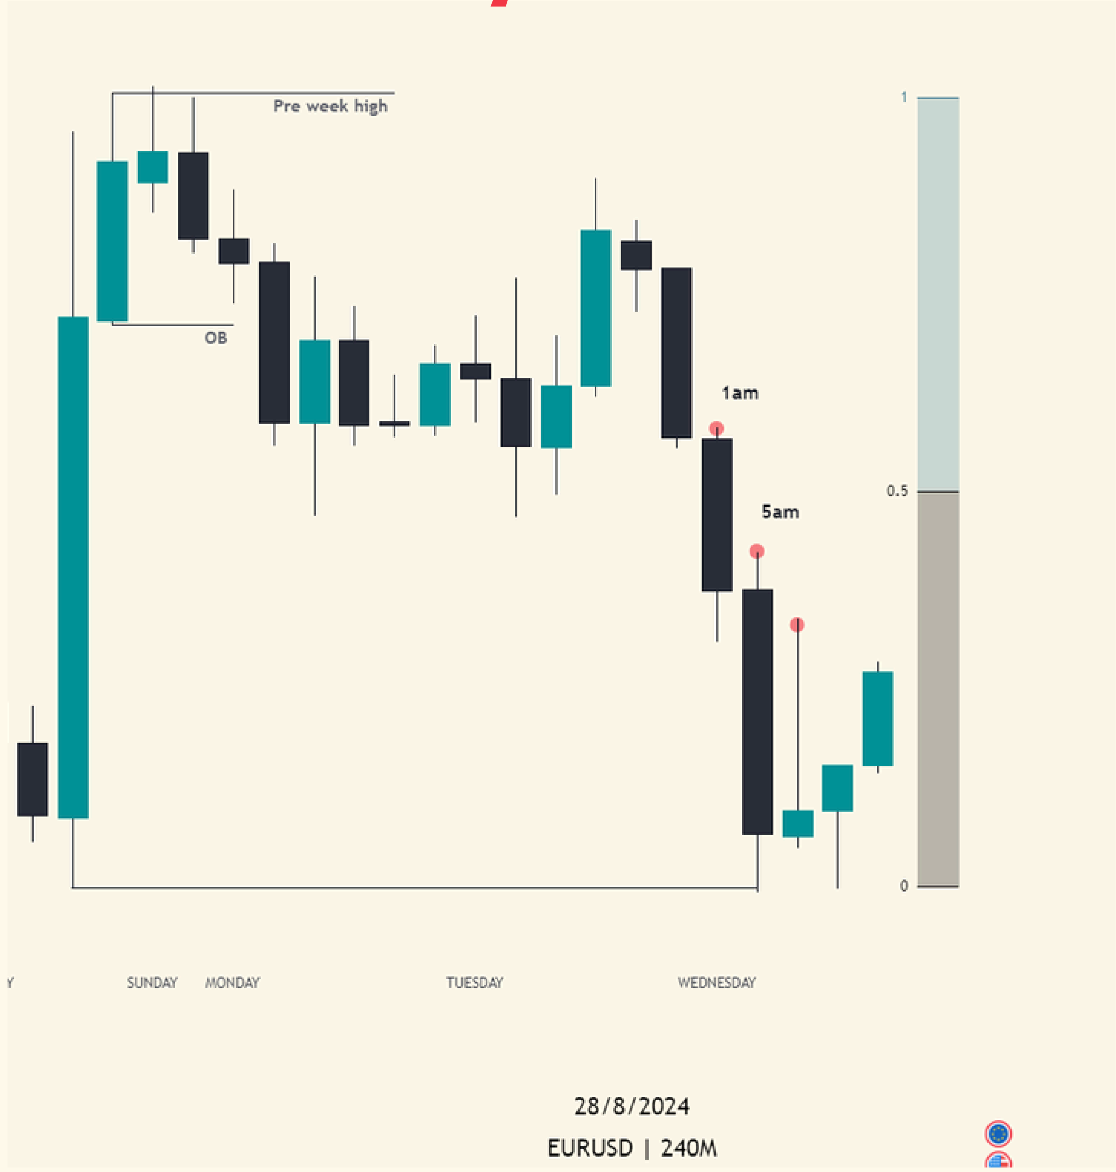
- Price rejecting from the Prev Wk high
- No purge- No red folder news- No trade

Tuesday



- Price rejecting from the PDL + discount
- 1am purge didn't work-price rejecting from discount.
- 5am supports buy

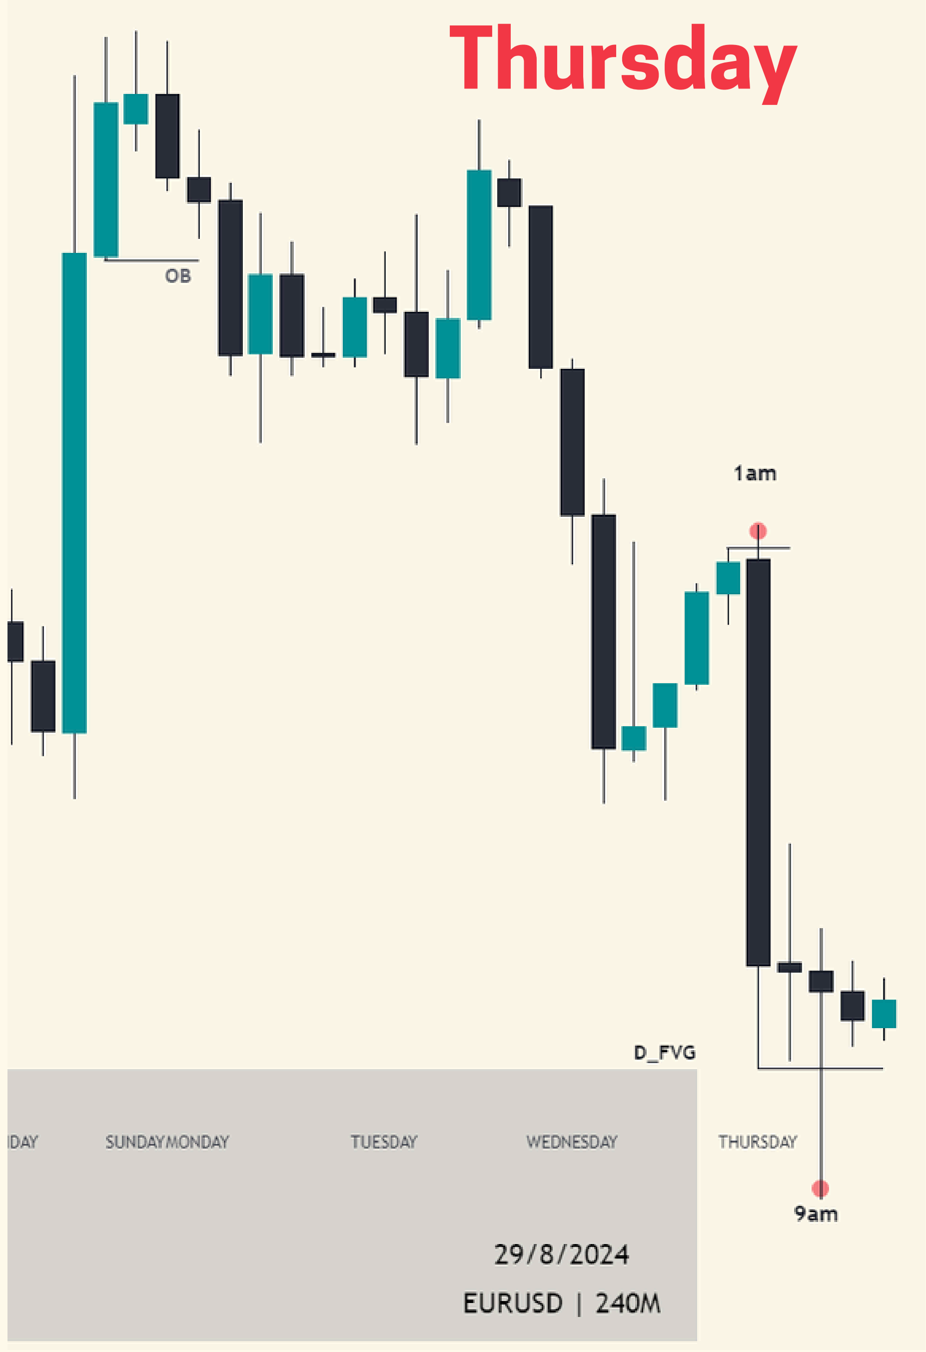
Wednesday



- Price rejecting from the premium
- No purge no trade
- CRT high to low completed

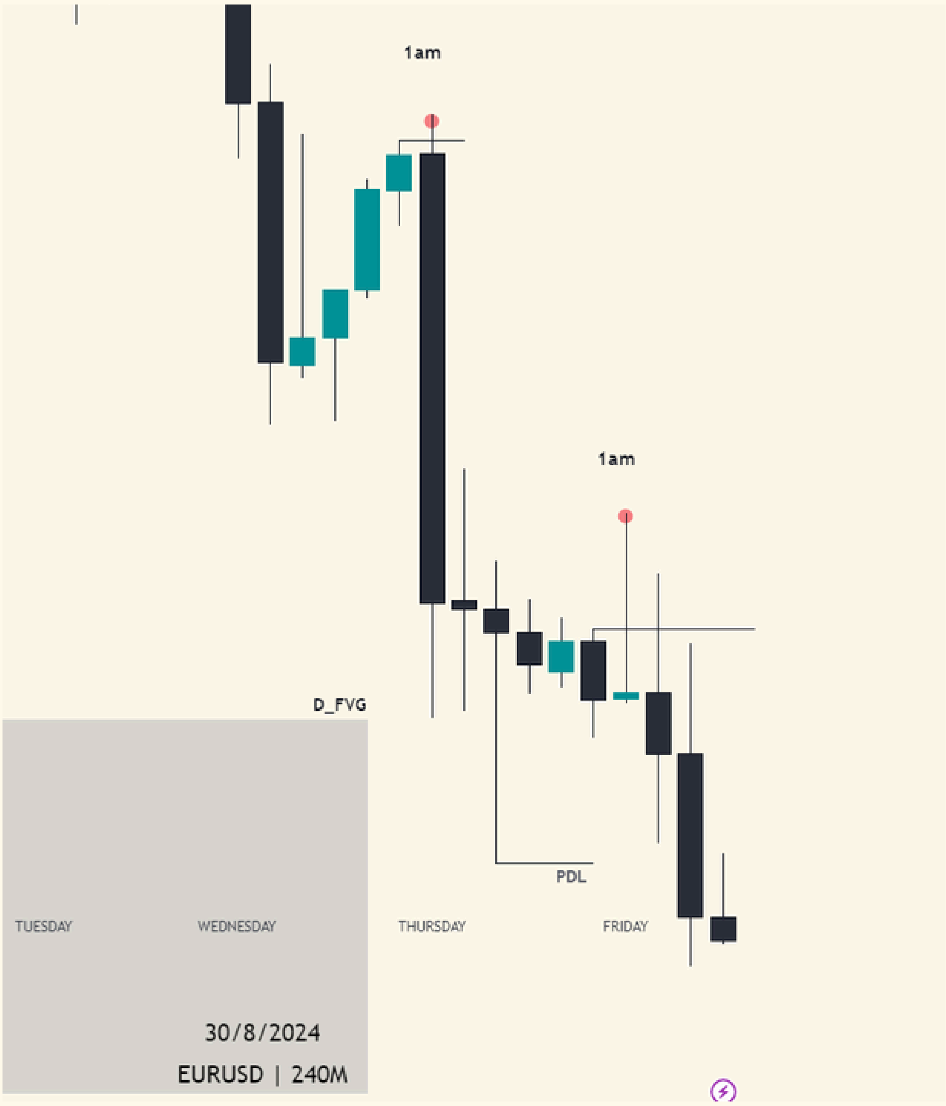
Review on EURUSD

Thursday



- 1am purge supports sell, as price strongly rejecting from the pre week high
- but price reaches the DFVG. no trade

Friday



- 1am purge supports sell, price reaches the PDl.
- No trade, price consolidates inside the DFVG

Points to remember

- **Pattern alone never works always.**
- **Only sell at premium & Buy at the discount.**
- **Look for TS at the specific key time**
- **Trading CRT along with HTF bias has better win rate.**
- **More the inside bars higher the probability.**
- **Book partials and Move Break even at the 50% of the range.**
