

# EUR/CAD Long Trade Alert

Hi guys good morning,

**EURCAD is setting itself up for a long. This momentum indicator is tuned to a harmonic cycle that resonates well to tops and bottoms to the EURCAD pair through cyclical analysis. We are now on bottoming on the RSI + a clear 5 wave pattern is sighted and is giving us a signal that the market needs to retrace for now. What i did here was measure the uptrend using a scale fixed chart using a circle, then by using the center point to connect to the side of another circle of the same size, and angle. We can see that we are on the lower section of this circle and it's indicating SUPPORT.**

**Long Entry level at: 1.2750**

**Use 35 pip stop at : 1.2733**

**TP 60 pips = 1.2820**

**Warm Regards,  
Buena**
